

Appendix 2

ACP Development Consent and Environmental Protection Licence

South East Open Cut Project
&
Modification to the
Existing ACP Consent

**DETERMINATION OF A DEVELOPMENT APPLICATION
FOR STATE SIGNIFICANT AND INTEGRATED DEVELOPMENT
UNDER SECTION 80 OF THE
ENVIRONMENTAL PLANNING AND ASSESSMENT ACT, 1979**

I, the Minister for Planning, under section 80 of the *Environmental Planning and Assessment Act 1979* ("the Act"), determine the development application ("the Application") referred to in Schedule 1 by granting consent subject to the conditions set out in Schedule 2.

The reasons for the imposition of conditions are to:

- a) minimise any adverse environmental impacts associated with the development;
- b) provide for environmental monitoring, reporting, and independent review; and
- c) set requirements for mine infrastructure provision.

Andrew Refshauge MP
Minister for Planning

Sydney, 11 October

2002

File No. S01/00200

SCHEDULE 1

Development Application:	DA No. 309-11-2001-i;
Applicant:	White Mining Limited (ACN009 713 893) ("the Applicant");
Consent Authority:	The Minister for Planning;
Land:	Land described as Lot 101 DP 635131; Part Lot 11 DP 261916; Lot 3 DP 195598; Part Lot 70 DP 752499; Part Lot 701 DP 828294; Lot 1 DP 745486; Part Lot 1243 DP 1007536; Lot 1 DP 195598; Lot 59 DP 752499; Crown land including Crown Roads adjoining Lot 1 DP 745486; Lot 128 DP 752499 (Reserve No.89555); Travelling Stock Reserve No. 66768; Part Camberwell Temporary Common; Main Northern Railway corridor; Glennies Creek Rd reserve; and New England Highway reserve; Parish of Vane;
Proposed Development:	Development of an open cut coal mine, an underground coal mine and construction and operation of associated surface facilities, known as the Ashton Coal Project (ACP);

State Significant Development

The proposed development is within a class of development classified as State Significant development by virtue of a Declaration made by the Minister on 29 June 2001 since it is a new coal mine which would require a new mining lease;

Integrated Development

The proposed development requires additional approvals from the **DEC** under the *Protection of the Environment Operations Act 1997*; **DIPNR** under the *Water Act 1912*; **DEC** under the *National Parks and Wildlife Act 1974*; RTA and Singleton Shire Council under the *Roads Act 1993*; and MSB under the *Mine Subsidence Compensation Act 1961*. Consequently it is classified as integrated development under section 91 of the *Environmental Planning and Assessment Act 1979*.

BCA Classification:

Class 10 – Portal, electrical substations, fan building, explosive magazines, conveyor structures, reclaim tunnels, railway bridges, pumping stations

Class 10(a) - Vehicle wash facilities, fuel farms, sewage treatment plant

Class 10(b) - Coal conveyors and coal crushing facility and associated infrastructure

Class 9(b) - Bath house

Class 8 - Coal preparation plant building, train loading station and compressor house

Class 7 - Warehouse buildings, workshops and water tanks

Class 5 - Administration buildings, rail loading control room

Note: If the Applicant is dissatisfied with this determination, section 97 of the Act grants it a right of appeal to the Land and Environment Court, which is exercisable within 12 months of receiving notice of this determination. To determine the date from which this consent operates refer to section 83 of the Act. To determine the date upon which this consent may lapse refer to section 95(1) of the Act.

SCHEDULE 2

INDEX

1. GENERAL	5
2. MINE MANAGEMENT	9
3. LAND AND SITE ENVIRONMENTAL MANAGEMENT	11
4. WATER MANAGEMENT AND MONITORING	31
5. HAZARDOUS MATERIALS AND OVERBURDEN MANAGEMENT	38
6. AIR QUALITY, BLAST, NOISE AND LIGHT MANAGEMENT	39
7. TRANSPORT AND UTILITIES	56
8. MONITORING / AUDITING	59
9. REPORTING	62
10. COMMUNITY CONSULTATION / OBLIGATIONS	65
11. PROPONENTS OBLIGATIONS	67
12. FURTHER APPROVALS AND AGREEMENTS	70

In this consent, except in so far as the context or subject-matter otherwise indicates or requires, the following terms have the meanings indicated:

AEMR	Annual Environmental Management Report
Act	<i>Environmental Planning and Assessment Act, 1979</i>
ACP	Ashton Coal Project
Applicant	White Mining Ltd
BCA	Building Code of Australia
CCC	Community Consultative Committee
construction	any activity required to be undertaken for the construction of the proposed development including site preparation, demolition, construction of roads, environmental bunds, surface facilities, rail infrastructure, and water management infrastructure, and any activity requiring a Construction Certificate
Council	Singleton Shire Council
DA	Development Application
DEC	Department of Environment and Conservation
Department	NSW Department of Planning
Director-General	Director-General of the NSW Department of Planning, or delegate
DLWC	NSW Department of Land and Water Conservation (<i>now the Department of Infrastructure, Planning and Natural Resources</i>)
DNR	Department of Natural Resources
DPI – Agriculture	Department of Primary Industries – Agriculture
DPI – Fisheries	Department of Primary Industries - Fisheries
DPI – Minerals	Department of Primary Industries - Minerals
dust	any solid material that may become suspended in air
EIS	Environmental Impact Statement
EMP	Environmental Management Plan
EPA	NSW Environment Protection Authority (<i>now the Department of Environment and Conservation</i>)

EPL	Environment Protection Licence issued under the <i>Protection of the Environment Operations Act, 1997</i>
First Workings	workings which establish access to the coal resource area and which does not result in surface subsidence. First Workings do not include longwall extraction of coal
GTA	General Term of Approval
Minister	Minister for Planning , or delegate
Mtpa	Million tonnes per annum
MOP	Mining Operations Plan
MSB	Mine Subsidence Board
NPWS	NSW National Parks and Wildlife Service (<i>now the Department of Environment and Conservation</i>)
operation/mining operations	any activity that results in the production, or intended production, of quantities of coal product to be transported off site. Includes vegetation removal and soil stripping relating to overburden removal and coal extraction.
POEO Act	<i>Protection of the Environment Operations Act, 1997</i>
Principal Certifying Authority	the Minister or an accredited certifier, appointed under section 109E of the Act, to issue a Part 4A Certificate as provided under section 109C of the Act
Regulation	<i>Environmental Planning and Assessment Regulation, 2000</i>
RIC	Rail Infrastructure Corporation
RTA	NSW Roads and Traffic Authority
project site/DA area	the land to which this consent applies
Secondary Workings	Extraction of coal by longwall mining or pillar extraction that may result in surface subsidence
Surface facilities	coal crushing facilities, coal preparation plant and associated coal handling facilities, coal stock piles, water storage dams, administration offices, bath house, heavy workshop, vehicle washdown stations, outdoor storage compound, equipment storage area, warehouse, and parking areas, explosive magazine, electrical substations, rail siding, train loading station, highway underpass, and roadworks.
TEOP	Tailings Emplacement Operation Plan
WML	White Mining Limited

Note	To assist with the explanation of the intent of certain conditions in this consent, a number of flow charts are provided in the attached Schedule A which illustrate various processes contained in this consent.
------	---

Red type represents 15 October 2003 modification
Blue type represents 27 January 2005 modification
Green type represents 19 February 2007 modification

1. GENERAL

Obligation to Minimise Harm to the Environment

1.1 There is an obligation on the Applicant to prevent and minimise harm to the environment throughout the life of the project. This requires that all practicable measures are to be taken to prevent and minimise harm that may result from the construction, operation and, where relevant, decommissioning of the development.

Scope of Development

1.2 The Applicant shall carry out the development generally in accordance with the:

- a) development application No.309-11-2001-I as amended by the document in subclause v);
- b) EIS, 3 volumes, dated November 2001, prepared by HLA Enviro-sciences Pty Ltd and certified in accordance with Section 78A(8) of the Act;
- c) Aboriginal Cultural Heritage Assessment dated July 2001, prepared by the Upper Hunter Wonnarua Council and forwarded in a letter from WML received 12 December 2001;
- d) conceptual design for upgrade works to Glennies Creek Road provided to SSC and PlanningNSW by WML dated 10 December 2001;
- e) information provided to PlanningNSW by WML on 4 February 2002, titled "Ashton Coal Project Meeting – PlanningNSW";
- f) additional information relating to flora and fauna surveys, the diversion of Bowmans Creek, water quality, groundwater, air quality and Aboriginal cultural heritage provided by HLA Enviro-sciences to PlanningNSW and other government agencies, dated 28 February 2002;
- g) information relating to groundwater impacts provided by HLA-Enviro-sciences to PlanningNSW dated 14 March 2002;
- h) additional information relating to subsidence impacts, groundwater impacts, agricultural impacts, project justification and blasting impacts provided by HLA Enviro-sciences to PlanningNSW dated 28 March 2002;
- i) additional water management information provided to **DEC** and other NSW Government agencies prepared by HLA Enviro-sciences Pty Ltd, dated 5 April;
- j) fax from WML to PlanningNSW dated 13 May 2002 relating to a meeting held on 7 May 2002;
- k) letter from HLA Enviro-sciences to PlanningNSW dated 16 May 2002, relating to flora and fauna surveys and agricultural impacts;
- l) description and proposed diversion option 2 provided by WML to PlanningNSW dated 17 May 2002; and

- m) response to public submissions from HLA Envirosciences to PlanningNSW dated 31 May 2002;
- n) additional information provided by WML regarding Northern Woodland Remnant dated 31 May 2002.
- o) additional information and letter provided by WML to PlanningNSW regarding Salinity and Green Offsets for the Project dated 20 June 2002;
- p) revised Aboriginal cultural heritage survey provided by HLA Enviro-sciences to PlanningNSW dated 24 June 2002;
- q) letter from HLA-Envirosciences to PlanningNSW dated 2 July 2002 relating to Green Offsets report;
- r) letter from HLA-Envirosciences to NPWS dated 3 July 2002 relating to Aboriginal cultural heritage;
- s) additional information relating to Aboriginal cultural heritage from HLA-Envirosciences to PlanningNSW dated 15 July 2002;
- t) fax from WML to PlanningNSW dated 25 July 2002 relating to Aboriginal consultation;
- u) letter from WML to PlanningNSW dated 12 August 2002 relating to a conservation area;
- v) amendment to DA from WML to PlanningNSW titled "Description of Alternate Mine Layout for Underground Mine (Option 4) dated 6 September 2002;
- w) fax from WML to PlanningNSW dated 13 September 2002 relating to an internal coal haul road;
- x) [Submission Pursuant to Section 96\(2\) of the Environmental Planning and Assessment Act 1979, dated August 2004, prepared by Ashton Coal Operations Pty Limited;](#)
- y) [Supplementary Air Quality Information, dated 9 November 2004, prepared by Holmes Air Sciences;](#)
- z) [Documents titled *Ashton Coal Tailings Pipeline – Application to Modify Development Consent and Statement of Environmental Effects, dated 2 November 2006* and prepared by Parsons Binkerhoff; and](#)
- aa) conditions of this consent.

1.3 [If there is any inconsistency between the above documents, the latter document shall prevail over the former to the extent of the inconsistency. However, the conditions of this consent shall prevail over all other documents to the extent of any inconsistency.](#)

Provision of Documents

1.4 Where practicable, the Applicant shall provide all draft documents and reports required to be submitted to the Director-General under this consent in an appropriate electronic format. Approved versions of documents are to be provided as a hard copy. Provision of documents and reports to other parties, as required

under this consent, shall be in a format acceptable to those parties and shall aim to minimise resource consumption.

Note: at the date of this consent, an appropriate electronic format for submission to the Director-General is the "portable document format" (pdf) or another format that may be readily converted to portable document format.

- 1.5 Nothing in this consent prevents the Applicant from combining reporting requirements under this consent with identical or similar reporting requirements for submission to another relevant party. Reporting requirements shall only be combined with the prior agreement of the Director-General of Planning and the Director-General (or equivalent) of the other relevant party, if reporting to that party is to be modified.

Note: the purpose of conditions 1.4 and 1.5 is to provide for minimisation of resource utilisation (particularly paper) associated with administration of this consent.

- 1.6 The Applicant shall make the following documents available to the public upon request at the mine site and SSC, and shall post all documents on the internet, within 14 days of approval of the documents by the Director-General or relevant agency:
- a) this consent;
 - b) any licences or approvals for the mine obtained from Government agencies;
 - c) the Mining Operations Plan; and
 - d) all documents required under this consent, including the environmental management strategy, environmental management plans, AEMR's, SMIARs, and Independent Audits.

Statutory Requirements

- 1.7 The Applicant shall ensure that all licences, permits and approvals for the development are obtained and kept up-to-date as required.

Dispute Resolution

- 1.8 In the event that a dispute arises between the Applicant and Council or the Applicant and a public authority other than the Department, in relation to a specification or requirement applicable under this consent, the matter shall be referred by either party to the Director-General, or if not resolved, to the Minister, whose determination of the dispute shall be final and binding on all parties. For the purpose of this condition, "public authority" has the same meaning as provided under section 4 of the Act.

Note: Section 121 of the *Environmental Planning and Assessment Act 1979* provides mechanisms for resolution of disputes between the Department, the Director-General, councils and public authorities.

Compliance

- 1.9 The Applicant shall ensure that employees, contractors and sub-contractors are aware of, and comply with, the conditions of this consent relevant to their respective activities.

- 1.10 At least two weeks prior to each of the events listed from a) to b) below, an independent person(s) or organisation(s), approved by the Director-General, shall certify in writing to the satisfaction of the Director-General, that the Applicant has complied with all conditions of this consent applicable prior to that event. Where an event is to be undertaken in stages, the Applicant may, subject to the agreement of the Director-General, stage the submission of compliance certification consistent with the staging of activities relating to that event:
- a) commencement of construction; and
 - b) commencement of mining operations.
- 1.11 Notwithstanding condition 1.10 of this consent, the Director-General may require an update report on compliance with all, or any part, of the conditions of this consent. Any such update shall meet the requirements of the Director-General and be submitted within such period as the Director-General may agree.
- 1.12 The Applicant shall meet the reasonable requirements of the Director-General in respect of the implementation of any measure necessary to ensure compliance with the conditions of this consent, and general consistency with the documents listed under condition 1.2 of this consent. The Director-General may direct that such a measure be implemented in response to the information contained within any report, plan, correspondence or other document submitted in accordance with the conditions of this consent, within such time as the Director-General may agree.
- 1.13 Any compliance report or compliance update required under condition 1.10 or 1.11 of this consent shall be made available for public inspection on request.
- 1.14 If at any time, the Director-General is made aware of the occurrence of any environmental impacts from the proposal that pose serious environmental and/or amenity concerns, due to the failure of environmental measures required by the Conditions of Consent to ameliorate the impacts, the Director-General may order the Applicant to cease the activities causing those impacts until those concerns have been addressed to the satisfaction of the Director-General.

Period of Approval/Project Commencement

- 1.15 This consent provides approval for mining for a period of 21 years from the date of granting of a mining lease pursuant to this consent.

Note: Conditions of this consent may require activities to be carried out by the Applicant beyond the period of approval for mining.
--

- 1.16 Date of commencement of construction and Mining Operations is to be notified in writing to the Director-General, and SSC, at least two weeks prior to commencement of construction and Mining Operations respectively.

Security Deposits and Bonds

- 1.17 Security deposits and bonds will be paid as required by [DPI - Minerals](#) under mining lease approval conditions.

Prohibition of Works

- 1.18 The Applicant shall not construct any diversion of Bowmans Creek as proposed in the EIS.
- 1.19 The Applicant shall not construct any private haul road from the site to the Macquarie Generation coal conveyor as proposed in the EIS.

2. MINE MANAGEMENT

Mine Management Plan, Operations and Methods

- 2.1 No mining undertaken in accordance with this consent shall occur until the Applicant has submitted and had accepted by the [DPI - Minerals](#), a Mining Operations Plan (MOP) in accordance with current guidelines issued by [DPI - Minerals](#).
- 2.2 The MOP shall:
- a) be prepared in accordance with [DPI - Minerals](#) Guidelines for the Preparation of Mining Operations Plans (Document 08060002.GUI or its most recent equivalent);
 - b) demonstrate consistency with the conditions of this consent and any other statutory approvals;
 - c) demonstrate consistency with the Environmental Management Strategy and Environmental Management Plans for the project site;
 - d) provide the basis for implementing mining operations, environmental management, and ongoing monitoring;
 - e) include a mine rehabilitation and Land Use Management Plan; and
 - f) identify a schedule of proposed mine development for the period covered by the plan and include:
 - (i) the area proposed to be impacted by mining activity and resource recovery mining methods and remediation measures;
 - (ii) areas of environmental, heritage or archaeological sensitivity and mechanisms for appropriately minimising impact;
 - (iii) water management, and
 - (iv) proposals to appropriately minimise surface impacts.
- 2.3 In preparing the MOP, the Applicant shall consult with affected service authorities and make arrangements satisfactory to those authorities for the protection or relocation of those services.
- 2.4 A copy of the MOP, excluding commercial in confidence information, shall be forwarded to SSC and the Director-General within 14 days of acceptance by [DPI - Minerals](#).
- 2.5 At least two years prior to the cessation of mining operations the Applicant shall investigate, determine and report, taking account of the potential community benefits, on a final strategy for the future use of the mine site, weirs, dams and any other infrastructure in consultation with the Department, [DIPNR](#) and SSC and for approval of [DPI - Minerals](#) and the Director-General.
- [2.5A The Applicant shall submit a detailed design and management plan to the DPI-Minerals. The Applicant shall not place overburden on the eastern emplacement area above RL 125 metres until the DPI-Minerals has approved the plan.](#)

2.5B Prior to placing overburden on the eastern emplacement area above RL 125 metres, the Applicant shall revise the Mine Operations Plan (MOP) for the development to the satisfaction of the DPI-Minerals. The revised MOP shall:

- a) demonstrate consistency with the commitments made in documents listed in condition 1.2 and compliance with conditions of this consent; and
- b) include a schedule for the rehabilitation of the eastern emplacement area.

Tailings Emplacement Operation Plan

2.5C Prior to commissioning pipelines for offsite emplacement of tailings the Applicant shall:

- a) develop a Tailings Emplacement Operation Plan (TEOP) to the satisfaction of DPI. The TEOP shall become an annexure to the Ashton Coal MOP and shall include details of the proposed stabilisation and revegetation of all soil disturbance areas and other detail as described in *Ashton Coal Tailings Pipeline - Application to Modify Development Consent and Statement of Environmental Effects*, dated 2 November 2006 and prepared by Parsons Brinkerhoff; and
- b) provide a revised security deposit calculation for rehabilitation to the DPI based on the amended MOP.

Spontaneous Combustion

2.6 The Applicant shall prepare, prior to the commencement of Mining Operations, a Spontaneous Combustion Management Plan to the satisfaction of [DPI - Minerals](#).

Limit on Production/Hours of Operation

2.7 Annual production of coal from the ACP shall not exceed 5.2 Mtpa of ROM coal.

2.8 Hours of operation at the development shall be as follows:

Operation	Operating Hours
Open cut mining	7am-10pm Monday to Saturday, and 8am-10pm Sunday
Underground Mining, Train loading, and CHPP operation	24 hrs, 7 days
Blasting	9am-5pm Monday to Saturday.

3. LAND AND SITE ENVIRONMENTAL MANAGEMENT

Appointment of Environmental Officer

- 3.1 The Applicant shall employ a suitably experienced Environmental Officer(s) for the duration of activities undertaken under this consent whose appointment is to receive prior approval by the Director-General. The Officer(s) shall:
- a) be responsible for the preparation of the environmental management plans;
 - b) be responsible for considering and advising on matters specified in the conditions of this consent and compliance with such matters;
 - c) be responsible for receiving and responding to complaints in accordance with condition 10.3;
 - d) facilitate an environmental induction and training program for all persons involved in any activities undertaken under this consent; and
 - e) have the authority to require reasonable steps to be taken to avoid or minimise unintended or adverse environmental impacts and failing the effectiveness of such steps, to stop work immediately if an adverse impact on the environment is likely to occur.
- 3.2 The Applicant shall notify the Director-General, [DPI - Minerals](#), [DEC](#), RTA, MSB, [DPI - Fisheries](#), SSC, and the CCC of the name and contact details of the Environmental Officer(s) upon appointment and any changes to that appointment.

Environmental Management Strategies and Plans

- 3.3 The Applicant shall prepare an Environmental Management Strategy providing a strategic context for the environmental management plans (refer condition 3.6). The Environmental Management Strategy shall be prepared following consultation with the [DEC](#), [DPI - Minerals](#), SSC, [DPI - Fisheries](#), RTA, MSB, [DPI - Agriculture](#), and the Department, to the satisfaction of the Director-General. The strategy shall be provided to the Director-General no later than two weeks before the first environmental management plan under condition 3.6 is submitted.
- 3.4 The Environmental Management Strategy shall include, but not be limited to:
- a) statutory and other obligations which the Applicant is required to fulfill during construction and mining, including all approvals and consultations and agreements required from authorities and other stakeholders, and key legislation and policies;
 - b) definition of the role, responsibility, authority, accountability and reporting of personnel relevant to environmental management, including the Environmental Officer(s);

- c) overall environmental management objectives and performance outcomes, for construction, mining and decommissioning of the mine, for each of the key environmental elements for which management plans are required under this consent;
 - d) overall environmental and social objectives for the project, and a strategy for the restoration and management of the environmental and social values affected by mining operations within the context of those objectives;
 - e) identification of cumulative environmental impacts and procedures for dealing with these at each stage of the development;
 - f) overall objectives and strategies to promote economic productivity within the area affected by mining;
 - g) procedures to ensure that all relevant approvals, management plans, and procedures are complied with by all staff and contractors;
 - h) processes for conflict resolution in relation to the environmental management of the project;
 - i) a conceptual project schedule indicating when key activities would be undertaken and proposed timeframes and proposed timeframes for submission and approval of Environmental Management Plans; and
 - j) documentation of the results of consultations undertaken in the development of the Environmental Management Strategy.
- 3.5 The Applicant shall make copies of the Environmental Management Strategy available to [DIPNR](#), [DEC](#), [DPI - Minerals](#), [SSC](#), [DPI - Fisheries](#), [RTA](#), [MSB](#), [DPI - Agriculture](#), and the Department, and the CCC within fourteen days of approval by the Director-General.
- 3.6 The Applicant shall prepare the following environmental management plans, which may also form part of the Mining Operations Plan:
- a) Subsidence Environmental Management Plan (refer condition 3.18)
 - b) Archaeology and Cultural Heritage Management Plan (refer condition 3.36)
 - c) Flora and Fauna Management Plan (refer condition 3.46)
 - d) Erosion and Sediment Control Plan (refer condition 3.50)
 - e) Soil Stripping Management Plan (refer condition 3.51)
 - f) Landscape and Revegetation Management Plan (refer condition 3.55)
 - g) Final Void Management Plan (refer to condition 3.56)
 - h) Bushfire Management Plan (refer condition 3.57)
 - i) Land Management Plan (refer condition 3.58)
 - j) Site Water Management Plan and Groundwater Management Plan (refer condition 4.24)
 - k) Waste Management Plan (refer condition 5.3)
 - l) Construction Air Quality Management Plan (refer condition 6.10)
 - m) Operations Air Quality Management Plan (refer condition 6.10)
 - n) Blasting/Vibration Management Plan (refer condition 6.26)
 - o) Road Closure Management Plan (refer to condition 6.27)
 - p) Construction Noise Management Plan (refer condition 6.42)
 - q) Noise Management Plan (refer condition 6.43)
 - r) Lighting Management Plan (refer condition 6.56)

Environmental management plans are to be reviewed, and updated as necessary, at least every 5 years or as otherwise directed by the Director-General, in consultation with the relevant government agencies. Plans shall reflect changing environmental circumstances and changes in technology or best-practice management procedures.

- 3.7 The Applicant may, subject to written approval of the Director-General, divide the preparation and submission of any environmental management plans required under this consent, listed in condition 3.6, between open cut and underground mining operations. Any intention to divide environmental management plans shall be declared and approved in the Environmental Management Strategy (condition 3.3).
- 3.8 The Applicant shall make copies of the environmental management plans in condition 3.6 above available to the relevant government agencies, SSC and the CCC, within 14 days of approval.

Subsidence Management

General

- 3.9 The Applicant shall design underground mining operations to ensure no direct hydraulic connection between the Bowmans Creek alluvium and the underground workings can occur through subsidence cracking. In order to achieve this criteria the Applicant shall assess levels of uncertainty in all subsidence predictions, and provide adequate contingency in underground mine design to ensure sufficient sound rock is maintained to provide an aquaclude between the Bowmans Creek alluvium, and the underground mine goaf.
- 3.10 The Applicant shall make every reasonable effort to ensure that any member of the public entering an area affected by subsidence in the mining area is made aware of any danger caused by the surface subsidence, including impacts on roads.
- 3.11 The Applicant shall monitor and remediate any mine subsidence related impact including cracking, slumping, and erosion and provide stabilising structures in any areas that have significant risk of destabilisation occurring as a result of longwall panel mining, in accordance with [DIPNR](#) guidelines, to the satisfaction of [DIPNR](#) and in consultation with [DEC](#) and [DPI - Fisheries](#).
- 3.12 The Applicant shall maintain an access road from the New England Highway to property No. 130 (refer EIS Volume 3, Figure 3.13). Any realignment of the existing access road shall be designed and constructed by the Applicant in consultation with the owner of property No. 130, Council, [DPI - Minerals](#), the local Aboriginal community, and [DEC](#), and to the satisfaction of the Director-General. The Applicant shall submit design and plans for any realignment to the Director-General for approval one month prior to commencement of construction of the realignment. The Applicant shall have prepared and registered by the Land Titles Office a right of way over any realignment of the access road in favour of the landowner of property No. 130. The Applicant shall be responsible for rehabilitation and revegetation of any disused sections of the access road after realignment.
- 3.13 At least nine (9) months prior to the extraction of coal from Longwall Panel 1, as defined in the EIS, by longwall mining or other mining methods requiring approval under Section 138 of the Coal Mines Regulation Act 1982, the Applicant shall advise the landowner of property No. 130 of the Applicant's plans for future mining activities

and the specific impacts (based on best available information) affecting each property.

- 3.14 At least one month prior to the commencement of the following activities, the Applicant shall notify the owner of property No. 130 (refer EIS Volume 3, Figure 3.13) in writing of the proposed activity and any potential impacts due to that activity:
- a) construction of development headings (first workings) under the property; and,
 - b) lodgement of an application in accordance with Section 138 of the *Coal Mine Regulation Act, 1982* to longwall mine (secondary workings) under the property.
- 3.15 The Applicant shall monitor the condition of watercourses above longwall panels in the mining area, during mining and continue monitoring until completion of post mining rehabilitation to the satisfaction of [DPI - Fisheries](#), to identify any impacts on aquatic habitats or fish passage, and implement appropriate actions if and when adverse impacts occur.
- 3.16 ¹No tunnelling or mining shall occur directly underneath the piers or abutments of Bowmans Creek Bridge. The RTA must approve access tunnel layouts in the vicinity of the Bridge.
- 3.17 ²The angle of draw for the mine subsidence after removal of the coal is to be kept outside of the New England Highway Road Reserve.

Subsidence Environmental Management Plan

- 3.18 The Applicant shall prepare and implement a Subsidence Environmental Management Plan (SEMP) to detail an environmental management framework, practices and procedures to be followed during longwall mining activity at the mine. This Plan shall include, but not necessarily be limited to:
- a) demonstration of consistency with commitments made in documents listed in condition 1.2 and compliance with the conditions of this consent;
 - b) detailed description of the proposed underground mining operations, the existing surface and underground environment, and predicted subsidence impacts on the following:
 - (i) surface topography;
 - (ii) geological integrity;
 - (iii) surface water hydrology and erosion;
 - (iv) groundwater systems;
 - (v) Aboriginal cultural heritage;
 - (vi) terrestrial and aquatic ecosystems;
 - (vii) land capability and agricultural suitability; and,
 - (viii) any surface improvements, including roads, dams, transmission lines, pipelines, cables, fences, water gauging stations, and buildings;
 - c) a detailed remediation strategy to remediate potential impacts identified in subclause b);

¹ Incorporates RTA General Term of Approval

² Incorporates RTA General Term of Approval

- d) consideration of the cumulative impacts of subsidence due to multiple seam extraction;
- e) identification of all statutory and other obligations that the Applicant is required to fulfil in relation to management of subsidence, including all consents, licences, approvals and consultations;
- f) a description of the roles and responsibilities for all relevant employees involved in the management of subsidence;
- g) environmental policies and principles to be applied to the management of subsidence;
- h) standards and performance measures to be applied to subsidence management, and a means by which environmental performance can be periodically reviewed and improved;
- i) management practices and procedures to ensure that environmental performance goals are met and to comply with the conditions of this consent;
- j) detail actions to be taken in the event of an emergency leading to adverse environmental impacts;
- k) a remediation strategy to address any identified damage to Bowmans Creek occurring through mining-induced subsidence. Any remediation strategy would involve works that would require approvals to be granted by [DIPNR](#) for implementation, and therefore must be submitted to [DIPNR](#) for approval. The remediation strategy is to include the following provisions:
 - (i) Identification of approval requirements for implementation of any works required;
 - (ii) Reporting of options to address degradation or obstruction to fish passage through the affected reach;
 - (iii) Vegetation re-establishment in affected areas of the creek banks, breakout points and submerged areas of the creek;
 - (iv) Locations for installation of any artificial bed controls which may be required to arrest actual or potential erosion along the affected reach;
 - (v) Timeframes to achieve remediation of each zone of degradation in the channel and sign off point for the entire affected corridor of creek affected by mining-induced subsidence;
 - (vi) Identification of Aboriginal heritage values and measures to minimise impacts on these values;
 - (vii) rehabilitation works, particularly re-snagging in consultation with [DPI - Fisheries](#) and the Upper Hunter River Rehabilitation Initiative (managed by Macquarie University and [DIPNR](#));
 - (viii) provision of compensatory habitat for subsidence impacts;
- l) ³provision for forwarding the position of weekly workings to the RTA when underground mining occurs within 200 metres of the New England Highway road reserve;
- m) specific consideration of measures to address any requirements of [DEC](#), [DIPNR](#), [DPI - Fisheries](#), [DPI - Minerals](#), [MSB](#), [DPI - Agriculture](#), [RTA](#), and the Council;

³ Incorporates RTA General Term of Approval

- n) results of consultation with the CCC, the local Aboriginal community, and affected landholders;
- o) the environmental monitoring requirements outlined under conditions 3.19-3.22 of this consent;

The Applicant shall submit the SEMP for the approval of the Director- General at least one month prior to the submission of an application for secondary workings (longwall mining) under section 138 of the *Coal Mines Regulation Act 1982*, or in such period otherwise agreed by the Director-General. An application for secondary workings (longwall mining) under section 138 of the *Coal Mines Regulation Act 1982* shall not be made until written approval has been received from the Director-General. Upon receipt of the Director-General's approval, the Applicant shall supply a copy of the SEMP to Council, DEC, RTA, DPI - Fisheries, and DIPNR within 7 days. The Applicant shall make the SEMP available for public inspection on request.

Subsidence Monitoring

- 3.19 The Applicant shall undertake a detailed and ongoing monitoring program of subsidence resulting from mining to the satisfaction of the Director-General and the DPI - Minerals and in consultation with DIPNR, DEC, DPI - Fisheries and according to the recommendations of any independent expert review [refer to Conditions 8.3-8.7]. The monitoring program shall extend from commencement of construction throughout the life of the mine and for a period of at least five years after the completion of mining, or other such period as determined by the Director-General in consultation with DIPNR, DEC, DPI - Fisheries and DPI - Minerals. Monitoring shall be supported by visual as well as technical records. Monitoring shall include, but not be limited to, the following:
- a) monitoring of all relevant subsidence parameters including vertical subsidence and ground strain;
 - b) results of detailed inspections of underground workings and coal seams noting any changes in roof or floor conditions, or any water inflows which may indicate the presence of geological features such as faults, dykes or joints;
 - c) records of surface geological mapping or subsurface investigation which may indicate the presence of geological structures, and assessment of any possible correlation between surface features and features in underground workings at seam level;
 - d) monitoring of the propagation and extent of subsidence-induced cracking including:
 - (i) plotting exact location, depth, and characteristics of surface cracks; and,
 - (ii) monitoring the extent of cracking connecting surface cracks to the collapsed goaf area;
 - e) regular monitoring of all water inflows to the underground mine including location and flowrate of inflows. Water quality analysis should be conducted if a significant change in water flow or discolouration is observed at any time to identify the possible source of the water;
 - f) monitoring of groundwater levels and quality;

- g) a survey of affected stream channel systems, including monitoring of rainfall, surface water flows, water ponding, and water quality;
- h) monitoring of Bowmans Creek as required by condition 3.20;
- i) monitoring of changes to surface water run-off and erosion;
- j) monitoring of cultural heritage sites;
- k) monitoring of impacts to agricultural land;
- l) monitoring of impact of subsidence on existing vegetation and terrestrial and aquatic ecosystems;
- m) monitoring and evaluation of subsidence management and remediation techniques identified in the SEMP; and
- n) a comparison of predicted subsidence impacts with actual impacts, and updating of predicted impacts for future longwalls and long-term impacts, particularly on groundwater systems and salinity.

3.20 The Applicant is to conduct a detailed Stream Monitoring Program on Bowmans Creek developed in consultation with [DIPNR](#) and [DPI - Fisheries](#). This monitoring is to commence at commencement of construction, or as otherwise directed by the Director-General, and is to be supported with visual records as well as technical records. The River monitoring program shall include, but not be limited to:

- a) a detailed benchmark survey of the affected length of Bowmans Creek, and the reaches from the nearest upstream bedrock control point from the effective zero point of subsidence to the nearest downstream control point from the effective zero point of subsidence (usually measured by the 20 mm limit of subsidence). This survey is to be completed at least one year prior to mining affecting the stream channel system, or as otherwise directed;
- b) pre-mining assessment including:
 - (i) identification of stable bedrock control points along the affected reach, and the nature and extent of bedrock control points.
 - (ii) identification of stable cross sectional survey control points along the affected reach.
 - (iii) identification of chain pillar survey control points to establish the change in vertical reduced levels and bed gradient change.
 - (iv) identification of stable control monitoring points to establish bedload transport through the affected reach.
 - (v) assessment of the extent of existing pool-riffle sequences, rock bar and cobble chute pools and bed gradient steepening through riffle sequences.
 - (vi) assessment of bank stability provision by existing vegetation galleries along the affected reach of Bowmans Creek.
 - (vii) the extent, floristics and structure of any existing wetlands or standing pools along the length of the affected reach of Bowmans Creek.
 - (viii) existing water quality and exchange/discharge rates of local groundwaters (both alluvial and underlying bedrock) to Bowmans Creek; and,
 - (ix) monitoring to benchmark fish, macroinvertebrates and aquatic habitat; water velocities and flow rates; and current geomorphological design and stability of the creek.
- c) immediate post-mining monitoring (at least twice in the period within one year of each longwall pass under Bowmans Creek), including:

- (i) extent of change in level and gradient from each control point identified in the pre-mining survey.
 - (ii) extent of change in cross section between each survey control point identified in the pre-mining survey.
 - (iii) change in pool-riffle sequence, depth and width of pools, location of breakout points for flood waters from the subsided troughs overlying each extracted longwall panel.
 - (iv) change in stream power relations through each chain pillar and chute/riffle sequence along the extent of the affected stream.
 - (v) obstruction to fish passage through reverse gradient slopes on the downstream face of each subsidence trough.
 - (vi) cumulative changes in stream power and tractive stress along the affected reach.
 - (vii) impacts on existing vegetation communities along Bowmans Creek from subsidence or other impacts, and potential impacted areas from potential breakout points along the channel (such as the southern length of subsidence overlying longwall panels 5, 6 and 7 beyond the incised meander of Bowmans Creek); and
 - (viii) monitoring to assess impacts to fish, fish passage, macroinvertebrates and aquatic habitat; water velocities and flow rates; and geomorphological design and stability of the creek.
- d) long term monitoring on a bi-annual basis extending for at least five years after longwall mining has been completed under Bowmans Creek;
- (i) changes in bed gradients, control point locations, pool/riffle locations and chute depths and energies along the affected reach of the creek.
 - (ii) changes in bedload transport rates, bed material sorting/imbrication, bedrock control exposure and energy relations in the affected reach of the creek.
 - (iii) drainage of local groundwaters into and water quality changes in each pool of Bowmans Creek, including an assessment of pool maintenance periods during dry periods resulting from discharge of local groundwaters into Bowmans Creek.
 - (iv) vegetation community changes along the length of the affected channel.
 - (v) long term changes in biological communities within the affected reach of the creek; and
 - (vi) monitoring to assess impacts to fish, fish passage, macroinvertebrates and aquatic habitat; water velocities and flow rates; and geomorphological design and stability of the creek.

3.21 ⁴A detailed survey of the New England Highway road corridor is to be undertaken. Permanent monitoring stations must be installed as part of the initial survey. The initial survey is to be undertaken jointly with the RTA.

3.22 ⁵Subsidence monitoring on the New England Highway is to be undertaken on a 3 monthly basis until the cessation of the mining process and pending ground movement.

3.23 The Applicant shall report on monitoring conducted and provide a full interpretation results in the SMIAR (condition 3.24) and the AEMR.

⁴ Incorporates RTA General Term of Approval

⁵ Incorporates RTA General Term of Approval

Subsidence Monitoring and Impact Assessment Report

3.24 The Applicant shall prepare and implement a Subsidence Monitoring and Impact Assessment Report (SMIAR) for each longwall panel or group of panels for which an application for secondary workings approval under s.138 of the *Coal Mines Regulation Act 1982* will be sought. The report is to be submitted for approval to the Director-General, in consultation with and taking into account requirements of the Director-General of the [DPI - Minerals](#), the [DEC](#), [DIPNR](#) and [DPI - Fisheries](#), at least one month prior to the submission of the s.138 application to the [DPI - Minerals](#). The Director-General may require Independent Expert Review (conditions 8.3-8.7) of a SMIAR prior to approval. No application for secondary workings approval under s.138 of the *Coal Mines Regulation Act 1982* longwall panels proposed in the SMIAR shall be made until written approval is received from the Director-General.

Note: A protocol is currently being developed by [DPI - Minerals](#) for interagency consultation on Subsidence Management Plans which would require approval prior to s138 applications being lodged. This protocol may, if implemented, overlap with the requirements of this consent such as submission and approval of Subsidence Monitoring and Impact Assessment Reports. The Applicant may apply for combination of these reporting requirements under condition 1.5 if the [DPI - Minerals](#) protocol is established and implemented.

3.25 Subsidence Monitoring and Impact Assessment Reports shall be consistent with the conditions of this consent, the Environmental Management Strategy and relevant environmental management plans.

3.26 The Applicant shall not apply, under section 138 of the *Coal Mines Regulation Act 1982*, for any longwall panels involving mining that may impact the Bowmans Creek alluvium until at least three longwall panels in the Pikes Gully Seam have been completed (panels 1, 2, and 3 as described in document referenced in 1.2v)) and the first SMIAR has been approved by the Director-General.

3.27 SMIARs and s138 applications are to be prepared and submitted in the following sequence:

SMIAR No	To be submitted at completion of panel No	Panel currently being extracted	Panels in s138 Application
1	3	4	5, 6, 7 (PGS)
2	6	7	8, 9, 10, 11 (ULS)
3	10	11	12, 13, 14 (ULS)
4	13	14	15, 16, 17, 18 (ULLS)
5	17	18	19, 20, 21 (ULLS)
6	20	21	22, 23, 24, 25 (LBS)
7	24	25	26, 27, 28 (LBS)

Note:

PGS – Pikes Gully Seam

ULS – Upper Liddell Seam

ULLS – Upper Lower Liddell Seam

LBS – Lower Barrett Seam

Panel numbers as described in document referenced in 1.2v)

Note: Prior to the commencement of longwall mining on the first group of panels, the Applicant is required to submit a Subsidence Environmental Management Plan under condition 3.18 and report on baseline monitoring in the AEMR.

3.28 Subsidence Monitoring and Impact Assessment Reports shall include, but not be limited to:

- a) detailed description of the proposed group of longwall panels and workings to be applied for in the section 138 application;
- b) comparison of subsidence impacts predicted for completed sections of the underground mine with actual impacts recorded through subsidence monitoring;
- c) update information describing the existing environment in the area to be mined including geology, groundwater, surface water, surface topography, aboriginal heritage, land capability, and aquatic and terrestrial ecosystems based on monitoring results from programs under conditions 3.19-3.23 and 4.26, current knowledge and incorporating cumulative impacts from any mining completed on other seams in the area;
- d) revise subsidence impact predictions for the area to be mined taking into account the results of the above review;
- e) ⁶a Groundwater Management Report prepared by an independent expert to the satisfaction of [DIPNR](#), addressing:
 - (i) work done under and the level of compliance with, the groundwater management measures defined in the Groundwater Management Plan; and
 - (ii) identification of trends in groundwater monitoring data and comparison with predictions, in documents referred to in condition 1.2 and any previous SMIARs, over the life of mining operations.
- f) ⁷For SMIAR No. 1, an independent audit of groundwater conditions in panels 1, 2, and 3, and any current monitoring on panel 4, conducted by an independent expert. The audit brief and independent expert are to be approved by [DIPNR](#) prior to audit commencement.
- g) revise the assessment of the impacts of subsidence on geology, groundwater, surface water, surface topography, aboriginal heritage, agricultural suitability, and aquatic and terrestrial ecosystems in the area proposed to be mined;
- h) detailed assessment of assumptions and uncertainty in predictions and demonstration that sufficient contingency has been built into in the proposal to address this uncertainty;
- i) demonstrate compliance of the proposal with the conditions of this consent, particularly condition 3.9, and relevant licences, approvals, standards and policies;
- j) ⁸a review of the Mine Plan should excessive subsidence occur on the New England Highway so as to ensure that the Highway is maintained in a safe, serviceable and repairable condition;

⁶ (deleted)

⁷ (deleted)

⁸ Incorporates RTA General Term of Approval

- k) details of feasible options to appropriately avoid, minimise and remediate impacts from subsidence;
- l) specific consideration of any requirements of [DEC](#), [DIPNR](#), [DPI - Fisheries](#), [DPI - Minerals](#), MSB, RTA, and the Council,
- m) results of consultation with CCC, the local Aboriginal community, and affected landholders;
- n) justification of the proposed longwall extraction plan;
- o) review the implementation of the SEMP (condition 3.18) and identify any parts of the plan that require modification. If the SEMP requires modification a copy of the revised SEMP shall be submitted with the SMIAR.

Adverse longwall mining subsidence impacts

3.29 The Applicant shall investigate and undertake to the satisfaction of the Director-General, and in consultation with [DEC](#), [DIPNR](#) and [DPI - Fisheries](#), alternative mine plans if subsidence impacts, such as impacts on groundwater systems, and potential long-term salinity impacts, as a result of the mine are demonstrated to be greater than those predicted in the EIS or SMIARs. This may include altering mining methods or restricting longwall mining in certain areas.

Heritage Assessment, Management and Monitoring

General

3.30 ⁹The Applicant shall provide for permanent conservation of the land shown on the indicative plan in Schedule 3 (the “conservation area”) through establishment of a Conservation Agreement with the Minister for the Environment under Part 4, Division 7 of the *National Parks and Wildlife Act 1974*. The purpose of the Conservation Agreement shall be to protect and conserve Aboriginal cultural heritage, and biodiversity, within the conservation area and any other purpose agreed to by the Applicant and the Minister for the Environment. The agreement shall include provision for the developing of a Plan of Management for the conservation area, developed in consultation with the local Aboriginal community, which reflects the purpose of the Conservation Agreement. The content of the Plan of Management shall be as agreed by the relevant parties and generally in accordance with the following principles:

- a) the area shall be conserved in perpetuity;
- b) agriculture and grazing shall be allowed in areas where such activities would not compromise or conflict with:
 - (i) conservation of Aboriginal cultural heritage sites;
 - (ii) conservation of biodiversity; or,
 - (iii) commitments regarding revegetation and management of native habitat areas, particularly the southern woodland remnant, made in documents referred to in condition 1.2;
- c) weed control and bushfire protection measures shall be permitted as necessary;
- d) underground mining of the conservation area shall be permitted, in accordance with this consent;

⁹ Incorporates [DEC](#) General Term of Approval

- e) specific measures shall be developed to ensure conservation of Aboriginal heritage and threatened species;
- f) rehabilitation and revegetation works shall be permitted where they do not conflict with conservation of Aboriginal cultural heritage;
- g) a permanent access road across the area shall be permitted; and
- h) access to the area by the local Aboriginal community shall be permitted.

The Applicant shall commence negotiations with the Minister for the Environment within six months of the granting of the mining lease. The Applicant shall provide a copy of the agreement to the Director General and SSC within 14 days of the agreement being signed.

- 3.31 The Applicant shall report on results of cultural heritage surveys and monitoring of the site before, during, and after mining operations annually in the AEMR. The purpose of the reporting shall be to identify new areas or increases to the area identified in condition 3.30 for the establishment of Conservation Agreements as defined in condition 3.30. The Applicant shall submit AEMRs to DEC and the Director-General for consideration. Following evaluation of the reporting in the AEMRs, the Director-General may, in consultation with DEC, request the Applicant to establish a Conservation Agreement following the procedure in condition 3.30.
- 3.32 Within six months of the commencement of mining operations, the Applicant shall make a contribution of \$50,000 towards a trust fund set up by the Department and the Public Trustee for the purposes of a regional study into Aboriginal cultural heritage as defined by the Trust Deed.
- 3.33 The Applicant shall provide the local Aboriginal community with the opportunity to recover artefacts as approved by the s90 permits, and arrange access to Aboriginal heritage on the site upon receipt of a request.
- 3.34 If, during the course of any activities conducted under this consent, the Applicant becomes aware of any heritage or archaeological sites not previously identified, all work likely to affect the site shall cease immediately. The Applicant shall then consult with relevant authorities and decide on an appropriate course of action prior to recommencement of work. The relevant authorities may include DEC, the NSW Heritage Office, and the relevant local Aboriginal community. Any necessary permits or consents shall be obtained and complied with prior to recommencement of work.
- 3.35 The Applicant shall consult regularly with the local Aboriginal community using consultation principles and strategies consistent with those outlined in the *“Guidelines for best practice community consultation in the NSW Mining and Extractive Industries”* or relevant DEC guidelines when available. The results of these consultations shall be documented in the AEMR.

Archaeology and Cultural Heritage Management Plan

- 3.36 The Applicant shall prepare an Archaeology and Cultural Heritage Management Plan (ACHMP) to address Aboriginal and European cultural heritage issues. The Plan shall be prepared in consultation with the local Aboriginal community, and DEC, and to the satisfaction of the Director-General. The Plan shall include but not be limited to:

- a) demonstration of consistency with commitments made in documents listed in condition 1.2 and compliance with the conditions of this consent;
- b) identification of all areas of conservation within the DA area;
- c) provision of management strategies including procedures and protocols for conservation and protection of Aboriginal heritage sites for all parts of the DA area;
- d) identification of any salvage, excavation and monitoring programs for any cultural heritage/archaeological sites within the DA area;
- e) details of any Section 90 applications to be lodged, or consents obtained from DEC;
- f) details of consultation undertaken with the local Aboriginal community in the preparation of this Plan;
- g) details of procedures and programs to implement monitoring requirements in condition 3.37.
- h) details of the measures to fully document, in accordance with the NSW Heritage Office guidelines, any non-indigenous heritage sites that will be required to be removed as a result of the development; and
- i) details of proposed monitoring that will be undertaken in the areas adjacent to the non-indigenous heritage sites identified within the EIS .

The ACHMP shall be submitted for the approval of the Director-General no later than one month prior to the commencement of construction of the development, or within such period otherwise agreed by the Director-General. Construction shall not commence until written approval has been received from the Director-General. Upon receipt of the Director-General's approval, the Applicant shall supply a copy of the ACHMP to Council, DEC, and local Aboriginal community groups within 14 days. The Applicant shall make the ACHMP available for public inspection on request.

Monitoring

3.37 The Applicant shall monitor the effectiveness of the measures outlined in the Archaeology and Cultural Management Plan (Condition 3.36). A summary of monitoring results shall be included in the AEMR.

Note No Aboriginal archaeological sites shall be disturbed in any way without the prior approval of the Director-General of DEC, under section 90 of the *National Parks and Wildlife Act 1974*.

Flora and Fauna Assessment, Management and Monitoring

General

3.38 The revegetation of the DA area shall include, as a minimum, vegetation as shown on the Conceptual Final Landform and Vegetation Patterns plan attached as Figure A to information submitted to the Department on 28 March 2002 where this activity does not impact on Aboriginal heritage values.

- 3.39 Domestic stock and, where necessary, native fauna shall be excluded from all bushland revegetation areas.
- 3.40 Revegetation of areas not to be disturbed by open-cut mining, surface infrastructure, or overburden emplacement shall be completed within 6 years of the granting of a mining lease.
- 3.41 The Applicant shall use, to the greatest extent possible, indigenous seed and propagation materials in revegetation of the site. This shall be based on an environmentally sensitive program of seed collection on the site and from surrounding vegetation remnants, subject to landholders consent.
- 3.42 If threatened species are identified on the site during construction or operation of the coal mine, the Applicant shall cease any work immediately which could adversely impact on the species pending investigation and consultation with relevant government agencies. The Applicant shall engage a suitably qualified ecologist to investigate, and identify appropriate amelioration measures.
- 3.43 Those areas proposed to be mined and those areas proposed to be revegetated both by natural means and by direct seeding/planting shall be mapped so that the spatial and temporal relationship between the sequence of vegetation clearing, mining and habitat rehabilitation is clearly demonstrated.
- 3.44 Natural drainage patterns shall be re-established as far as practical.
- 3.45 During the life of the mine and until the revegetated areas are established to the satisfaction of the [DPI - Minerals](#), the Applicant shall maintain the revegetated areas. Maintenance shall include, where necessary, but not be limited to:
- a) replanting failed or unsatisfactory areas;
 - b) repairing erosion problems;
 - c) fire management, fire suppression or fire encouragement;
 - d) pest and weed control;
 - e) control of feral animal populations;
 - f) maintain and repair fencing;
 - g) fertiliser application; and
 - h) application of lime or gypsum to control pH and improve soil structure.

Flora and Fauna Management Plan

- 3.46 The Applicant shall prepare and implement a Flora and Fauna Management Plan (FFMP) for the DA area. The Plan is specifically required to outline procedures for clearing or disturbing vegetation and other habitat types, along with measures for habitat reinstatement and management. The Plan shall be prepared in consultation with [DEC](#) and SSC, and to the satisfaction of the Director-General. The Plan shall be prepared by an appropriately qualified and experienced ecologist. The ecologist shall be responsible for providing advice to minimise potential impacts upon threatened and protected fauna species that may utilise the site and to provide expert advice on the regeneration and reconstruction of flora and fauna habitat on mined areas. The Plan shall include but not be limited to:
- a) demonstration of consistency with commitments made in documents listed in condition 1.2 and compliance with the conditions of this consent;
 - b) details of strategic vegetation management, outlining timeframes for clearing and re-vegetation activities and a map illustrating the Plan. The Plan should aim to maximise scope for new vegetation to establish and restore ecological integrity;

- c) details of the creation, landscaping and management of on-site vegetation to provide habitat for the Grey-crowned Babbler and other threatened species likely to occur on the site;
- d) details of the creation, landscaping and management of ponds along Bowmans Creek, where practical, to provide for Green and Golden Bell Frog habitat; the creation of new habitat must be based on current findings related to nearby populations and must be integrated with existing habitat for this species on the site at Bowmans Creek and Bettys Creek, and with habitat which is proposed to be created on Bettys Creek by Glendell Mine;
- e) details of the schedule for clearing activities incorporating seasonal habitat requirements for species such as bats and other mammals, with the objective of avoiding incidents during sensitive hibernation and breeding periods.
- f) details of pre-clearance inspections, including the identification and inspection of trees containing tree hollows, including stags, prior to clearing of any vegetation;
- g) details of how micro habitats including dead trees, stags, stumps and hollow branches will, where practical, be salvaged and relocated to areas depauperate of tree hollow habitat and in the recreation of habitat areas;
- h) details of the establishment of roost and denning boxes appropriate for bat and avifauna species and methods for their regular maintenance. The details on the specific height, aspect, design, location and timing for the placement of the roosts and nest boxes shall consider any publicly available results and recommendations following the ongoing fauna habitat monitoring program occurring at the Mt Owen mine;
- i) details of the methods for strategically placing felled trees between cleared and remnant bushland to provide runways of ground cover for dispersion of animals;
- j) details of measures to care for any animals injured or found during clearing activities, including the use of WIRES to attend to fauna as necessary, and the methods for their relocation if appropriate. This shall include measures for harbouring and releasing nocturnal animals at night;
- k) strategies for the establishment of long-term post-mining land use objectives over the site;
- l) measures to re-instate vegetation communities and to use local endemic species for revegetation as soon as possible;
- m) methods to actively manage existing areas of remnant vegetation (habitat management zones) through fencing (using animal friendly materials) to exclude grazing animals and control of feral animals where practical, revegetate where appropriate, and maintain weed and fire controls;
- n) strategies for the establishment of wildlife corridor links to adjoining habitat areas and integration of rehabilitation works with nearby mines;
- o) details of strategies for the exclusion of grazing stock on areas of native bushland reconstruction;
- p) measures to monitor the success of revegetated areas and plant additional species where necessary;

- q) methods of revegetation;
- r) consideration of Aboriginal heritage management to ensure that activities under the Plan do not impact on Aboriginal heritage values;
- s) development of a protocol for identifying and managing significant impacts on any threatened flora and fauna species not identified in the EIS, during construction or operation of the mine; and
- t) details of the habitat monitoring required under this consent.

The FFMP shall be submitted for the approval of the Director-General, in consultation with [DEC](#), no later than one month prior to the commencement of construction of the development, or within such period otherwise agreed by the Director-General. Construction shall not commence until written approval has been received from the Director-General. Upon receipt of the Director-General's approval, the Applicant shall supply a copy of the FFMP to Council, [DIPNR](#), [DPI - Fisheries](#), and [DEC](#), within 14 days. The Applicant shall make the FFMP available for public inspection on request.

Monitoring

- 3.47 The regeneration works shall be monitored by an appropriately qualified and experienced ecologist. The results of the monitoring and the effectiveness of the revegetation and the FFMP shall be reported annually as part of the Annual Environmental Management Report in accordance with the Department of Mineral Resource's Guidelines to the Mining, Rehabilitation and Environmental Management Process (March 1998) or its latest version.
- 3.48 The Applicant shall prepare a detailed monitoring program of habitat areas on the site, including any wetlands and aquatic habitats, during the development and for a period after the completion of the development to be determined by the Director-General in consultation with [DEC](#). The monitoring program shall be included in the FFMP and a summary of the results shall be provided in the AEMR. The program shall:
- a) monitor impacts attributable to the development and include monitoring of the success of any restoration or reconstruction works. The Applicant shall carry out any further works required by the Director-General and [DPI - Minerals](#) as a result of the monitoring;
 - b) establish an ongoing monitoring program of the existing and proposed revegetated areas to assess their floristics and structure and to propose contingency measures for improvements to revegetation if required; and
 - c) establish an ongoing monitoring program of fauna species diversity and abundance and the effectiveness of reconstructed ecosystems in providing fauna habitat and contingency measures should impacts be identified as occurring.

Note: Emphasis should be given to the need for monitoring of the effectiveness of rehabilitation to learn from the process. It should be noted that both positive and negative outcomes need to be reported, to maximise the opportunity to incorporate best practice principles into future mining proposals. The information obtained from the monitoring shall be used to guide future revegetation efforts on the mine site.

Erosion and Sediment Control

General

3.49 Sedimentation dams must be constructed to contain or treat surface water runoff from all mining areas and areas disturbed by mining including overburden dumps, topsoil stockpiles, unsealed roads and areas cleared of vegetation. Sedimentation dams must be designed:

- a) so that the maximum flow velocity through the dams meets [DIPNR](#) guidelines;
- b) to prevent short circuiting;
- c) if inflow is likely to contain oil or other deleterious floating matter a baffle must be installed at the outlet to prevent discharge of that matter; and,
- d) so as to avoid impacts on Aboriginal heritage values.

Erosion and Sediment Control Plan

3.50 The Applicant shall prepare an Erosion and Sediment Control Plan (ESCP) for the surface facilities and mining operations in consultation with [DIPNR](#) and SSC, taking account of the DLWC “*Draft Guideline for Establishment of Stable Drainage Areas on Rehabilitated Minesites*” or its latest version, and to the satisfaction of [DIPNR](#), and the Director-General. The Erosion and Sediment Control Plan shall include but not be limited to:

- a) demonstration of consistency with commitments made in documents listed in condition 1.2 and compliance with the conditions of this consent;
- b) details of temporary and permanent sediment and erosion control systems to be used during both mine construction and operation, including for earthworks associated with landscaping;
- c) details of soil salinity management where relevant;
- d) ¹⁰measures that will be employed to minimise soil erosion and the discharge of sediment and other pollutants to lands and/or waters during construction and operation activities.
- e) ¹¹demonstration that the Plan is in accordance with the requirements for such plans outlined in *Managing Urban Stormwater: Soils and Construction* (available from the Department of Housing) or its latest version for construction, or *Managing Urban Stormwater: Council Handbook* (available from the [DEC](#)) or its latest version, for operation;
- f) details of the proposed measures to maximise the retrieval of topsoil for subsequent use in the rehabilitation program;
- g) consideration and management of erosion and sedimentation of surface watercourses/waterbodies, including all creeklines within the DA areas;

¹⁰ Incorporates [DEC](#) General Term of Approval

¹¹ Incorporates [DEC](#) General Term of Approval

- h) consideration of Aboriginal heritage management to ensure that activities under the Plan do not impact on Aboriginal heritage values;
- i) measures to construct banks, channels and similar works to divert stormwater away from disturbed and contaminated land surfaces such as mine workings, haul roads, overburden disposal areas, coal handling areas and wastewater treatment facilities. All diversion banks, channels and points of discharge must be constructed or stabilised so as to minimise erosion and scouring; and
- j) a program for reporting on the effectiveness of the sediment and erosion control systems and performance against objectives contained in the approved Erosion and Sediment Control Management Plan, and EIS.

The Applicant may submit ESCPs for construction and mine operation separately. The ESCP(s) shall be submitted for the approval of the Director-General, and [DIPNR](#), no later than one month prior to the commencement of construction or operation of the development, as appropriate, or within such period otherwise agreed by the Director-General. Construction or operation, as appropriate, shall not commence until written approval has been received from the Director-General and [DIPNR](#). Upon receipt of the Director-General's approval, the Applicant shall supply a copy of the ESCP to Council and [DPI - Minerals](#) within 14 days. The Applicant shall make the ESCP available for public inspection on request.

3.51 The Applicant shall prepare a Soil Stripping Management Plan (SSMP) to the requirements of [DPI - Minerals](#) and [DIPNR](#) that shall include, but not be limited to:

- a) demonstration of consistency with commitments made in documents listed in condition 1.2 and compliance with the conditions of this consent;
- b) details of the management of soil stockpiles, soil stripping techniques and scheduling; and
- c) a program for reporting on the effectiveness of the soil stripping methods and performance against objectives contained in the Soil Stripping Management Plan, and EIS.

The SSMP shall be submitted for the approval of [DPI - Minerals](#) and [DIPNR](#), no later than one month prior to the commencement of construction of the development, as appropriate, or within such period otherwise agreed by the [DPI - Minerals](#) and [DIPNR](#). Construction shall not commence until written approval has been received from [DPI - Minerals](#) and [DIPNR](#). Upon receipt of approval, the Applicant shall supply a copy of the SSMP to Council, and the Department within 14 days. The Applicant shall make the SSMP available for public inspection on request.

Site Rehabilitation Management

3.52 The Applicant shall carry out rehabilitation of all mine areas in accordance with the requirements of any Mining Lease granted by the Minister for Mineral Resources and ensure the progressive rehabilitation of the area is also to the satisfaction of [DIPNR](#). The rehabilitation shall also have regard to [DPI - Minerals' Synoptic Plan – Integrated Landscapes for Minesite Rehabilitation \(1999\)](#) for the Upper Hunter, or its latest version.

Visual Amenity and Landscaping

General

- 3.53 The Applicant shall design buildings and structures associated with the development with a colour scheme which aims to minimise the visual impact of the development on surrounding land uses and maximise the ability of the development to "blend into" local vegetation and other visual components.
- 3.54 The Applicant shall ensure that visual bunding is installed at strategic locations around the site, generally in accordance with the EIS, to minimise impacts on visual amenity.

Landscape and Revegetation Management Plan

- 3.55 The Applicant shall prepare a Landscape and Revegetation Management Plan (LRMP) for approval by the Director-General. The Plan shall be prepared in consultation with the SSC and [DPI - Minerals](#). The plan shall have regard to [DPI - Minerals's Synoptic Plan – Integrated Landscapes for Minesite Rehabilitation \(1999\)](#) for the Upper Hunter, or its latest version. The Plan shall include, but not be limited to, the following:
- a) demonstration of consistency with commitments made in documents listed in condition 1.2 and compliance with the conditions of this consent;
 - b) an on-site landscaping strategy detailing design and proposed planting of trees and shrubs and the construction of mounding or bunding along Glennies Creek Road and the New England Highway;
 - c) appropriate erosion control and sediment control practices for earthworks associated with the landscaping;
 - d) details of visual appearance of all buildings, structures, facilities or works (including paint colours and specifications);
 - e) details, specifications, and staged work programs to be undertaken, maintenance of all landscape works and maintenance of building materials and cladding;
 - f) details of how vegetation screening and fauna protection corridors will be incorporated into the proposed visual and landscaping works; and
 - g) use of indigenous species and fauna habitat reconstruction in revegetation areas.

The LRMP shall be submitted for the approval of the Director General, no later than one month prior to the commencement of construction of the development, or within such period otherwise agreed by the Director General. Construction shall not commence until written approval has been received from the Director General. Upon receipt of approval, the Applicant shall supply a copy of the LRMP to Council, and [DPI - Minerals](#) within 14 days. The Applicant shall make the LRMP available for public inspection on request.

3.55A Within 1 month of placing overburden on the eastern emplacement area above RL 125 metres, the Applicant shall:

- a) commence implementation of an on-site and off-site landscaping strategy to minimise the visual impacts of the eastern emplacement area which includes tree planting along Glennies Creek Road, the slopes of the ridge south of Glennies Creek Road and adjacent to the New England Highway; and
- b) revise the Landscape and Revegetation Management Plan for the development to demonstrate consistency with the commitments made in documents listed in condition 1.2 and compliance with the conditions of this consent,

to the satisfaction of the Director-General.

Final Void Management

3.56 The Applicant shall prepare a Final Void Management Plan (FVMP) to the satisfaction of the Director-General, in consultation with [DPI - Minerals](#), [DIPNR](#), and SSC. The Plan shall include, but not be limited to, the following:

- a) demonstration of consistency with commitments made in documents listed in condition 1.2 and compliance with the conditions of this consent;
- b) an investigation of options for future use of the final void;
- c) a re-examination and validation of groundwater modelling of the potential effects on the local and regional groundwater;
- d) details of a strategy for the long term management of the final void;
- e) details of strategies to minimise any adverse impacts where the assessment indicates the potential for degradation to surrounding water resources; and
- f) details of programs for catchment management, including the types of fertilisers used in the rehabilitation programs to ensure that there is little residual risk of nutrient enrichment of final void water.

The FVMP shall be submitted for the approval of the Director General, no later than the end of year 5 of the development or within such period otherwise agreed by the Director General. Upon receipt of approval, the Applicant shall supply a copy of the FVMP to Council, [DIPNR](#), and [DPI - Minerals](#) within 14 days. The Applicant shall make the FVMP available for public inspection on request. The FVMP shall be reviewed and updated every five years, or as otherwise agreed by the Director General.

Bushfire and other Fire Controls

3.57 The Applicant shall:

- a) provide adequate fire protection works on site, including the availability of trained personnel, water tankers and fire fighting equipment and annual hazard reduction measures with particular attention to boundaries of adjoining landholdings;
- b) make available to the Rural Fire Service and emergency services when required, water carts and trucks in cases of bushfire incidents on the mine site;

- c) submit an annual report on fire management activities to the Singleton Fire Control Officer; and
- d) prior to commencement of mining operations prepare a Bushfire Management Plan for all its holdings contained in the DA area, to the satisfaction of SSC and the Rural Fire Service.

Land Management

3.58 The Applicant shall, prepare a Land Management Plan (LMP) for the areas of the proposed surface facilities, and its holdings in the DA area, to provide for proper land management in consultation with [DIPNR](#), [DPI - Agriculture](#), [DEC](#), and SSC, and to the satisfaction of the Director-General. The plan shall include, but not be limited to:

- a) demonstration of consistency with commitments made in documents listed in condition 1.2 and compliance with the conditions of this consent;
- b) a strategy for sustainable land management, including rehabilitation, revegetation, and habitat reconstruction works, for the land proposed to be swapped for the existing Camberwell Common and Travelling Stock Reserve. The strategy is to be funded and implemented by the Applicant and developed in consultation with the Camberwell Common Trust, the Rural Lands Protection Board, [DIPNR](#), Singleton Landcare, and the Hunter Catchment Management Trust. The strategy must have the approval of the Camberwell Common Trust and the Rural Lands Protection Board before submission to the Director-General. In the event that the land swap is not finalised when the LRMP is submitted, the Applicant shall provide an indicative timetable for implementation of the strategy and completion of the land swap;
- c) a strategy for sustainable land management and enhancement of agricultural values and production across the entire site, taking into account biodiversity and Aboriginal heritage values as appropriate;
- d) pastures and vegetation management;
- e) prevention and rehabilitation of land degradation;
- f) control of weed infestation on topsoil stockpile material;
- g) assessment of the potential for recycling of standing timber removed from the site;
- h) eradication of vermin and noxious weeds as required by the Rural Lands Protection Board, the Upper Hunter Weeds Authority, the Prickly Pear Authority and other relevant authorities; and,
- i) feral animal control.

The LMP shall be submitted for the approval of the Director General, no later than one month prior to the commencement of mining operations, or within such period otherwise agreed by the Director General. Mining operations shall not commence until written approval has been received from the Director General. Upon receipt of approval, the Applicant shall supply a copy of the LMP to Council, [DIPNR](#), [DPI - Agriculture](#), [DEC](#), and [DPI - Minerals](#) within 14 days. The Applicant shall make the LMP available for public inspection on request.

- 3.59 The Applicant shall minimise the removal of trees and other vegetation from the proposed surface facilities area, and restrict any clearance to the areas occupied by mine activity, buildings and paved surfaces, and those areas necessary for fire control in accordance with SSC requirements.

Pipelines for offsite tailings emplacement and water sharing

- 3.60 The Applicant shall ensure that all pipelines for offsite tailings emplacement and water sharing are designed to remain safe, serviceable and repairable taking into account proposed and future mining by Newpac Underground Mine. The Applicant shall submit final working drawings for construction of pipelines in areas overlying the Newpac Underground Mine workings to the MSB for approval prior to commencement of works.

- 3.61 The Applicant shall ensure that design and construction of the pipeline crossing under the New England Highway shall be undertaken in accordance with paragraphs (a) – (k) or otherwise to the satisfaction of the RTA:

- a) the design shall be in accordance with information provided by Parsons Brinckerhoff (Drawing reference 2118508A-CIV-Figure 4) in the letter to the RTA dated 19 September 2006;
- b) a detailed survey with reference to bridge deck levels, the adjacent bridge piers and the proposed excavation levels shall be provided to the RTA's satisfaction;
- c) the difference between the bed level of the pipeline and the ground level at any pier shall not exceed 1.5m. If the level difference exceeds 1.5m a structural engineering report assessing the impact on the bridge structure shall be provided to the RTA;
- d) the proposed works shall not impact on the existing bridge structure, approaches or road pavements. All works shall be clear of the bridge including any proposed widening of the bridge structure;
- e) permanent markers are to be provided at the entry and exit points of the pipelines to the road reserve and the pipelines are to cross the road reserve in a straight line and as close to perpendicular as possible;
- f) any access points and valves shall be located outside of the highway reserve;
- g) all construction access shall be via existing access points, such as Brunkers Lane and the existing Ashton Coal access road. No new access to the New England Highway is permitted;
- h) the Applicant shall identify and avoid damaging any existing services, subsurface structures or above ground structures during construction works;
- i) any damage or impacts to the existing bridge structure or services within the road reserve caused during construction shall be repaired or remediated to the satisfaction of the RTA;
- j) all areas within the road reserve that are disturbed shall be restored to their original condition upon completion of the works and all restoration work shall be carried out to the satisfaction of the RTA; and
- k) works-as-executed drawings shall be provided to the RTA following completion of works within the road reserve.

- 3.62 Prior to commissioning pipelines for offsite emplacement of tailings and water sharing the Applicant shall:

- a) ensure that an activated alarm system and emergency response procedures are established, as described in *Ashton Coal Tailings Pipeline - Application to Modify Development Consent and Statement of Environmental Effects*, dated 2 November 2006 and prepared by Parsons Brinckerhoff; and
- b) amend the Ashton Coal Emergency Management Plan to incorporate the pipelines and emergency response procedures, to the satisfaction of the DPI.

3.63 The Applicant shall ensure that the alarm system and emergency response procedures established under condition 3.62 are effectively maintained and operational at all times during the operation of the pipelines.

4. WATER MANAGEMENT AND MONITORING

General

Surface Water

- 4.1 ¹²Except as may be expressly provided by a licence under the Protection of the Environment Operations Act 1997 in relation of the development, section 120 of the Protection of the Environment Operations Act 1997 must be complied with in and in connection with the carrying out of the development.
- 4.2 ¹³Any release of surplus minewater from the mine must comply with the requirements of the Hunter River Salinity Trading Scheme and any licence issued under the Protection of the Environment Operations Act unless otherwise directed by the [DEC](#).
- 4.3 ¹⁴The concentration of a pollutant in wastes discharged under the Hunter River Salinity Trading Scheme must not:
- a) cause salinity in the Hunter River to exceed 900 micro Siemens/cm (uS/cm) measured at Singleton.
 - b) contain more than 120 milligrams per litre (mg/l) of non-filtrable residue; and
 - c) be of a pH less than 6.5 or greater than 9.5.
- 4.4 Any application to the [DEC](#) for a licence under the Protection of the Environment Operations Act to discharge surplus minewater must be supported by a tributary impact statement. The tributary impact statement must include a geomorphologic evaluation of the watercourse and an assessment of the impact of the proposed discharge on the streams flora and fauna as well as any users and residents, downstream.
- 4.5 The Applicant shall develop contingency arrangements to dispose of excess saline water in a planned and managed manner to ensure that the mine water management system is not exceeded with a subsequent unmanaged discharge occurring.
- 4.6 ¹⁵Banks, channels and similar works must be constructed to divert stormwater away from disturbed and contaminated land surfaces such as mine workings, haul roads, overburden disposal areas, coal handling areas and wastewater treatment facilities. All diversion banks, channels and points of discharge must be constructed or stabilised so as to minimise erosion and scouring.
- 4.7 The works associated with the proposal shall not damage or interfere in any way with:
- a) vegetation outside the area of operation;
 - b) the stability of adjacent or nearby streams; or

¹² Incorporates [DEC](#) General Term of Approval

¹³ Incorporates [DEC](#) General Term of Approval

¹⁴ Incorporates [DEC](#) General Term of Approval

¹⁵ Incorporates [DEC](#) General Term of Approval

- c) the quality of water in the stream or watercourse below its ANZECC beneficial water use classification prior to the commencement of mining operations.
- 4.8 The Applicant shall, in consultation with [DIPNR](#), ensure that all soil and / or vegetation material to be removed from the area of operation is disposed of on an appropriate site where it will not be swept back into watercourses.

4.9 *(Deleted)*

Licences

- 4.10 The Applicant shall obtain a licence from [DIPNR](#) under Part 5 of the *Water Act 1912* for the bores and wells which intersect the groundwater table, including monitoring bores , dewatering bores, longwalls, and other excavations which intersect the groundwater table; and
- 4.11 The Applicant shall obtain a permit under Part 3A of the *Rivers and Foreshores Improvement Act 1948* or the *Water Management Act 2000*, as appropriate, for works within forty metres of a river as defined under the Act, prior to commencing any works for which the Approval is required.

Site Water Balance

- 4.12 The Applicant shall recalculate the mine water balance on a six-monthly basis to assess:
- a) whether climatic conditions and inflows to the mine are having a significant impact on mine water make and storage requirements; and,
 - b) address issues of additional storage which may be necessary to cope with the increased water make into the water circuit of the mine.

The recalculated water balances shall be reported in the AEMR.

Groundwater

- 4.13 ¹⁶All surface and underground operations including long wall mining shall be conducted to minimise potential impacts on groundwater flow and quality of the alluvial groundwater resource, integrity of the alluvial aquifer and to minimise off-site effects.
- 4.14 The Applicant shall undertake regular assessments of the accuracy of the groundwater model against the predictions outlined in the EIS, to the satisfaction of [DIPNR](#). The scope of the assessment shall be determined in consultation with [DIPNR](#) and shall include the consideration of the establishment of trigger levels via sensitivity testing, drawdown, pit seepage and river leakage. Should an assessment identify significant differences between the model and EIS predictions, the Applicant shall revise the assessment of the potential impacts on groundwater systems to the satisfaction of [DIPNR](#) and implement any further mitigation measures to the satisfaction of [DIPNR](#). The trigger levels for re-assessment of groundwater impacts shall be included in the Groundwater Management Plan required in condition 4.24.
- 4.15 The Applicant shall develop contingency measures to manage any impacts identified by monitoring that the management strategies have failed to predict or control, particularly relating to groundwaters associated with the alluvial aquifers of

¹⁶ *(deleted)*

Bowmans Creek, Glennies Creek and the Hunter River, to the satisfaction of [DIPNR](#). The implementation of contingency measures shall be linked to performance and cut-off criteria as determined in consultation with [DIPNR](#) and specified in the Site Water Management Plan, and shall include both water quality and aquifer pressure levels, should agreed standards or performance indicator levels not be achieved.

- 4.16 The Applicant shall prepare a statistical assessment to the satisfaction of [DIPNR](#) to initially benchmark the pre-mining natural variation in groundwater quality and quantity and to set trigger levels for accepting accountability. The assessment is to be documented in the SWMP (condition 4.24).
- 4.17 In the event that the development adversely affects groundwater users the Applicant shall, to the satisfaction of the [DIPNR](#), liaise with the users to provide a replacement water supply of similar quality and quantity to that affected, until such time as the development ceases to impact on the users' water supply. The cut-off levels for depressurization of the alluvial aquifer and water quality parameters shall be determined in consultation with the [DIPNR](#).

Wastewater management

- 4.18 ¹⁷A water management system must be constructed and utilised to manage the collection, storage, treatment, use and disposal of minewater, sewage effluent and other wastewater.
- 4.19 ¹⁸Bund(s) must be installed around areas in which fuels, oils and chemicals are stored. Bunds must:
- a) have walls and floors constructed of impervious materials;
 - b) be of sufficient capacity to contain 110% of the volume of the tank (or 110% volume of the largest tank where a group of tanks are installed);
 - c) have walls not be less than 250 millimetres high;
 - d) have floors graded to a collection sump; and
 - e) not have a drain valve incorporated in the bund structure.
- 4.20 ¹⁹A wastewater treatment facility with oil separator and sediment trap must be installed to treat drainage from the hardstand, vehicle servicing and general workshop areas.
- 4.21 ²⁰An area must be provided for the use of effluent from the sewage treatment plant. The design of the system must be in accordance with the [DEC's](#) draft guideline "Utilisation of Treated Effluent by Irrigation".
- 4.22 ²¹Wastewater utilisation areas must effectively utilise the wastewater applied to those areas. This includes the use for pasture or crop production, as well as ensuring the soil is able to absorb the nutrients, salts, hydraulic load and organic materials in the solids or liquids. Monitoring of land and receiving waters to determine the impact of wastewater application may be required by the [DEC](#).

¹⁷ Incorporates [DEC](#) General Term of Approval

¹⁸ Incorporates [DEC](#) General Term of Approval

¹⁹ Incorporates [DEC](#) General Term of Approval

²⁰ Incorporates [DEC](#) General Term of Approval

²¹ Incorporates [DEC](#) General Term of Approval

Stream Gauging Infrastructure

4.23 The Applicant is to negotiate relocation of the stream gauging station located on Bowmans Creek (formally known as stream gauge 210130, Foybrook downstream of Bowmans Bridge) with [DIPNR](#), prior to commencement of underground mining. The relocation of the gauging station will be at the Applicant's cost and will include all aspects of design, replacement, installation, commissioning, and any costs associated with correlation of data between the existing gauge and the new gauge. In line with NSW Government policy, the relocated gauging station is to accommodate fish passage. Any unforeseen cost associated with relocation of the gauging station will also be at the Applicant's cost.

Site Water Management Plan

4.24 ²²The Applicant shall prepare a Site Water Management Plan (SWMP) for the DA area, in consultation with [DIPNR](#), [DPI - Fisheries](#), and Council, to the satisfaction of the Director-General, which shall include, but not be limited to, the following matters:

- a) demonstration of consistency with commitments made in documents listed in condition 1.2 and compliance with the conditions of this consent;
- b) management of the quality and quantity of surface and ground water within the DA area;
- c) management of stormwater and general surface runoff diversion to ensure separate effective management of clean and dirty water;
- d) measures to prevent the degradation of downstream surface water quality below the pre-mining ANZECC beneficial water use classification due to mining operations;
- e) contingency plans for managing adverse impacts of the development on surface and groundwater quality, beyond trigger levels set in condition 4.14 and the Groundwater Management Plan;
- f) details of any proposed water extraction or supply of water from other mines or off-site sources;
- g) details of any reuse of contaminated water or circulation / distribution between ACP and other mines or operations. The volume of any such water transfers is to be documented in the AEMR;
- h) ²³measures to develop and implement a Stormwater Management Scheme to mitigate the impacts of stormwater run-off from and within the premises following the completion of construction activities. The Scheme shall be consistent with the Stormwater Management Plan for the catchment. Where a Stormwater Management Plan has not yet been prepared the Scheme should be consistent with the guidance contained in *Managing Urban Stormwater: Council Handbook* or its latest version (available from the [DEC](#));
- i) measures to ensure that poorer quality class waters are effectively reused on the site including consideration of segregation of waters based on salinity classes and other levels of contamination;

²² (deleted)

²³ Incorporates [DEC](#) General Term of Approval

- j) details of a strategy for the decommissioning of water management structures, including dirty water dams and clean water diversion dams;
- k) measures to isolate contaminated waters, including waters containing oil and grease, or other pollutants, operation chemical residues or other criteria, to avoid mixing with reuse or discharge waters;
- l) details of design and maintenance of all storages, diversions, transmission channels and sedimentation basins for the site, to minimise sedimentation of watercourses;
- m) measures to ensure adequate consultation with [DIPNR](#), [DEC](#), and the local Aboriginal community regarding design and location of surface water management structures;
- n) details of any licensing requirements for any extractions, storages, or other constructions on the site;
- o) measures for assessing chemical water quality impacts of the mining operation above and below the mine site
- p) projection of potential groundwater changes during mining (short term) and post-mining (long term) with particular attention given to the affect of changes to groundwater quality and mobilisation of salts;
- q) ²⁴a Groundwater Management Plan (GMP) to the satisfaction of [DIPNR](#), which details monitoring, contingency and remediation measures, and release criteria. The GMP component of the SWMP is to be endorsed by [DIPNR](#) prior to commencement of mining operations;
- r) measures to implement the surface and groundwater monitoring requirements in this consent; and,
- s) a program for reporting on the effectiveness of the water management systems and performance against objectives contained in the approved Site Water Management Plans, and EIS.

The SWMP shall be submitted for the approval of the Director-General, no later than one month prior to the commencement of construction of the development, or within such period otherwise agreed by the Director-General. Construction shall not commence until written approval has been received from the Director-General and [DIPNR](#). Upon receipt of the Director-General's approval, the Applicant shall supply a copy of the SWMP to Council, [DEC](#), [DPI - Minerals](#), [DIPNR](#) and [DPI – Fisheries](#), within 14 days. The Applicant shall make the SWMP available for public inspection on request.

4.24A Within 1 month of placing overburden on the eastern emplacement area above RL 125 metres, the Applicant shall revise the Site Water Management Plan to demonstrate consistency with the commitments made in the documents listed in condition 1.2 and compliance with the conditions of this consent, to the satisfaction of the Director-General.

²⁴ *(deleted)*

Surface and Groundwater Monitoring

4.25 The Applicant shall:

- a) construct and locate surface and groundwater monitoring positions, as identified in the Site Water Management Plan in consultation with [DIPNR](#) and [DEC](#), and to the satisfaction of the Director-General, prior to the commencement of construction;
- b) prepare a detailed monitoring program in respect of ground and surface water quality and quantity, including water in and around the DA area before, during and after mine operations in consultation with [DIPNR](#), [DEC](#), and [DPI - Fisheries](#), and to the satisfaction of the Director-General. The monitoring program shall have the capacity to collect sufficient data to adequately assess:
 - (i) the impact of any licensed groundwater extraction on groundwater levels on neighbouring properties and in the locality, and to identify any water quality impacts;
 - (ii) the impact of the development on groundwaters and groundwater dependent ecosystems associated with the alluvial aquifer(s) of Bowmans Creek, Glennies Creek, and the Hunter River;
 - (iii) any licensing requirements associated with the monitoring works;
 - (iv) develop a contingency program, with identified stages of implementation, to address potential adverse impacts or degradation of the groundwater systems beyond predictions, particularly relating to the groundwater associated with the alluvial aquifer(s) of Bowmans Creek, Glennies Creek, and the Hunter River and to the groundwaters in the vicinity of any rejects. Degradation occurs where the quality classification of the groundwater system is reduced to a lower class; and
 - (v) any concerns or complaints from surrounding landholders on groundwater matters, and any ensuing actions these records, which shall be maintained and be available to [DIPNR](#).

The monitoring program shall be incorporated in the Site Water Management Plan and shall include the duration (pre, during and post mining), sites to be sampled, frequency of sampling, the parameters to be measured, the need for any contingency plans, the reporting procedure and determination of appropriate cut-off criteria for monitoring purposes determined in consultation with [DIPNR](#). The results of the monitoring program shall be reported in the AEMR. The monitoring program for post-mining shall be prepared by year 20 of mine operations and extend at least 5 years after mine closure or as determined by [DIPNR](#).

- c) report on the monitoring results and raw data in the AEMR on the following matters:
 - (i) a basic statistical analysis (mean, range, variance, standard deviation) of the results for the parameters measured in individual bores / wells and as a subset of the aquifer;
 - (ii) an interpretation of the water quality results and changes in time for water quality and water levels (supported with graphs, contour plots showing changes in aquifer pressure levels);
 - (iii) an interpretation and review of the results in relation to cut-off criteria and predictions made in the EIS;
 - (iv) an interpretation of the water balance identifying the volume and make up of mine pit inflows as compared to Part V licence (required under Part V of the *Water Act 1912*), and predictions made in the EIS or previous AEMR; and

- (v) provide an electronic copy of the data forwarded to [DIPNR](#).

Underground Mining Groundwater Monitoring

- 4.26 ²⁵Prior to the commencement of underground mining and subject to [DIPNR](#) approval, the licence holder shall develop and implement a surface and subsurface investigation and monitoring program to assess the likely fracturing of geological strata and hydraulic property changes above each longwall panel. The monitoring program shall provide an interpreted comparison of the results from all longwall panels against pre-mining baseline geological conditions, in order to assess the level of variability of fracture, changes in hydraulic properties between panels, and the impact on groundwater resources and surface expression from underground mining at varying depths. This investigation shall be repeated for each seam as it is mined from the site. The monitoring plan shall:
- a) measure the level of surface water flows, groundwater elevations and water quality prior to mining;
 - b) assess the influence of mine-induced fracturing on aquifers and groundwater quantity;
 - c) assess the influence of mine-induced fracturing and cross aquifer connection on groundwater quality;
 - d) identify sampling locations, monitoring wells/bores along the mine path, to assess the impact of mining in mid goaf and at the predicted points of tension fracturing, at the edge of each long wall panel
 - e) prescribe sampling and observation depths, monitoring frequency and parameters for monitoring; and
 - f) specify the compilation, interpretation and reporting of groundwater data and analyses.
- 4.27 ²⁶All monitoring data shall be submitted to [DIPNR](#) in a report which, includes data, interpretation of results, and a discussion of monitoring results compared to groundwater and salinity impact predictions stated in the EIS.
- 4.28 ²⁷The licence holder shall develop a reporting mechanism, for inclusion in the EMP, in order to:
- a) verify the predictions of the groundwater modelling used in the Environmental Impact Statement; and
 - b) assess the potential long term changes in groundwater flow and quality which may occur as a result of mining operations and changes to hydraulic properties, as a result of subsidence of the hard rock strata underlying the alluvium.

²⁵ [\(deleted\)](#)

²⁶ [\(deleted\)](#)

²⁷ [\(deleted\)](#)

5. HAZARDOUS MATERIALS AND OVERBURDEN MANAGEMENT

Overburden Emplacement and Management

- 5.1 The Applicant shall construct and manage the overburden emplacements as set out in the EIS, and to the satisfaction of the [DPI - Minerals](#); and
- 5.2 The Applicant shall undertake measures, as far as practical, to prevent spontaneous combustion from occurring on the site.

Waste

- 5.3 One month prior to the commencement of construction works, the Applicant shall prepare and implement a Waste Management Plan (WMP) for the DA area in consultation with SSC and [DEC](#) and to the satisfaction of the Director-General. The Plan shall include, but not be limited to:
- a) details of measures to facilitate waste management on site;
 - b) details of compliance with the Applicant's obligations under the *Protection of the Environment Operations Act, 1997*;
 - c) identification of all types and quantities of waste materials produced at the mine site during construction, commissioning and operation;
 - d) programs aimed at minimising the production of waste at the mine site through the implementation of operational and management measures;
 - e) details of the potential reuse and recycling avenues for waste materials produced at the mine site, including collection and handling procedures;
 - f) details of appropriate disposal routes in the event that reuse and recycling avenues are not available or are not practicable; and
 - g) programs for involving and encouraging employees and contractors to minimise waste production at the mine site and reuse / recycling where appropriate.
- 5.4 ²⁸The Applicant must not cause, permit or allow any waste generated outside the premises to be received at the premises for storage, treatment, processing, reprocessing or disposal or any waste generated at the premises to be disposed of at the premises, except as expressly permitted by a licence under the *Protection of the Environment Operations Act, 1997*. This condition only applies to the storage, treatment, processing, reprocessing or disposal of waste at the premises if it requires an environment protection licence under the *Protection of the Environment Operations Act, 1997*.
- 5.5 The Applicant shall dispose of all solid waste and putrescible matter from the site to the satisfaction of SSC or [DEC](#), as relevant.

²⁸ Incorporates [DEC](#) General Term of Approval

6. AIR QUALITY, BLAST, NOISE AND LIGHT MANAGEMENT

Air Quality Management and Monitoring

Air Quality Standards/Goals and Performance Criteria

6.1 The Applicant shall comply with the following ambient air quality standards/goals:

Table 1 Long Term Particulate Matter Criteria

POLLUTANT	STANDARD / GOAL	AGENCY
Total Suspended Particulate Matter (TSP)	90ug/m ³ (annual mean)	NH & MRC
Particulate matter < 10um (PM ₁₀)	30 ug/m ³ (annual mean)	NSW DEC

Table 2 Short Term Particulate Matter Goal

POLLUTANT	STANDARD / GOAL	AGENCY
Particulate matter < 10um (PM ₁₀)	50ug/m ³ (24 hr average)	NSW DEC

Table 3 NSW DEC Amenity Based Criteria for Dust Fallout

POLLUTANT	AVERAGING PERIOD	MAXIMUM INCREASE IN DEPOSITED DUST LEVEL	MAXIMUM TOTAL DEPOSITED DUST LEVEL
Deposited dust	Annual	2 g/m ² /month	4 g/m ² /month

Note: dust is assessed as insoluble solids as defined by AS 3580.10.1-1991 (AM-19)

- 6.2 The Applicant shall ensure the prompt and effective rehabilitation of all disturbed areas of the DA area following the completion of mining and associated activities in that area to minimise the generation of wind blown dust.
- 6.3 ²⁹Activities occurring at the premises must be carried out in a manner that will minimise emissions of dust from the premises.
- 6.4 Raw coal dump hoppers must be fitted with:
- a) an automatically activated dust suppression water spray system; and

²⁹ Incorporates DEC General Term of Approval

- b) windshields. The windshields must be full walls on three sides with a height of not less than two metres above the dump grate.
- 6.5 Belt conveyors, other than those whose functions preclude it, must be enclosed on the top and at least one side. Belt scrapers must be installed to effectively remove material from the underside of each belt.
- 6.6 Air pollution control equipment must be fitted to all drilling rigs to prevent fines generated during drilling being discharged to the atmosphere.
- 6.7 An effective water spray system must be installed at open coal stockpiles and operated at sufficient frequency to maintain the entire surface of the stockpile and related coal handling areas in a condition that will minimise the emission of wind blown or traffic generated dust.
- 6.8 Mobile tankers equipped with a pump and sprays must be provided to suppress dust from unsealed roads when in use.
- 6.9 Roads for coal or overburden haulage must be surfaced in selected hard, non-friable material. Soft mudstone, clay stone and shale must not be used.

Air Quality Management Plans

- 6.10 The Applicant shall prepare a Construction Air Quality Management Plan (CAQMP), and an Operations Air Quality Management Plan (OAQMP), detailing air quality safeguards and procedures for dealing with dust and other air emissions from the ACP mine to the satisfaction of the Director-General. The CAQMP shall be prepared in consultation with SSC. The OAQMP shall be prepared following consultation with SSC and other nearby mines with the aim of achieving a consistent approach in the preparation of the ACP OAQMP. The Plans shall include, but not be limited to:
 - a) demonstration of consistency with commitments made in documents listed in condition 1.2 and compliance with the conditions of this consent;
 - b) the identification of adversely impacted properties in accordance with the criteria detailed in Tables 1, 2, and 3 of condition 6.1;
 - c) specifications of procedures that will be used for monitoring dust deposition, PM₁₀, and TSP for the purpose of undertaking independent investigations, including any joint investigations with nearby mines;
 - d) a mine operating plan that will allow dust emissions from the mine to be progressively reduced should real-time ambient measurements of PM₁₀ concentrations and/or meteorological observations or forecasts indicate that emissions from ACP are likely to exceed the 24-hour average PM₁₀ standards in Table 2 of condition 6.1. The plan is to be updated as the mine develops and at least on an annual basis and should indicate specific measures that will be used to reduce dust emissions and the threshold conditions under which each control measure will be triggered;
 - e) an outline of the procedure used to notify property owners and occupiers as identified in the EIS or by monitoring that are likely to be adversely impacted by emissions from the mine in excess of criteria detailed in Tables 1, 2, and 3 of condition 6.1;
 - f) a procedure to address potential dust impacts on residential tenants at mine-owned residences and at residences where an agreement has been made

between a mining company and the landholder relating to exceedences of dust criteria, which is to be prepared in consultation with DEC, NSW Health, landowners of any residences potentially affected by dust levels exceeding the criteria in condition 6.1 as a result of the development, and the operators of other mining/industrial operations contributing to the impacts. This procedure shall:

- (i) ensure that all existing tenants of identified properties are advised in writing of the increase to fine particulate levels likely to occur at those locations during the operational life of the mine and that these increases are likely to result in exceedences of the criteria in condition 6.1. Information shall also be provided to the residents on the available research relating to the health effects of fine particulate matter;
 - (ii) ensure that all potential tenants are advised in writing of the increase to the fine particulate matter likely to occur at that location during the operational life of the mine prior to signing a residential tenancy agreement to occupy the residence. This advice must ensure that such tenants are aware that increases in emissions are likely to result in exceedences of the criteria in condition 6.1. Information shall also be provided to the residents on the available research relating to the health effects of fine particulate matter;
 - (iii) ensure that the advice provided to current and future tenants is based on current knowledge of ambient air quality monitoring, dispersion modelling results and air quality criteria; and,
 - (iv) provide a mechanism for providing current ambient air quality monitoring data, dispersion modelling results and air quality criteria to the residents of these affected residences.
- g) measures to reduce the potential for wind erosion from exposed surfaces, particularly the use of techniques that increase the surface roughness and reduce the potential for dust entrainment;
 - h) methods and frequency of making dust monitoring data publicly available, such as the placement of monitoring details and results on the internet;
 - i) details of an investigation program aimed at improving short-term modelling techniques, by better characterising dust source variations and focusing on the feasibility of developing shorter-term amenity indicators;
 - j) details of an investigation program aimed at improving modelling of real-time dust control strategies such as that employed at ACP;
 - k) the establishment of a protocol for handling dust complaints that include recording, reporting and acting on complaints;
 - l) appropriate mechanisms for community consultation;
 - m) outline of response and/or management measures to be undertaken in the event of complaints from a landowner where dust levels are demonstrated to be below the criteria in condition 6.1;
 - n) outlining proactive/predictive and reactive mitigation measures to be employed to minimize dust emissions including visible dust emanating from the site;
 - o) equipment to be available and used to control dust generation;
 - p) methods to determine when and how the mine operation is to be modified to minimise the potential for dust emissions, particularly from surface activities;
 - q) identification of longer term strategies directed towards mitigating dust levels;

- r) details of locations and frequency of ambient TSP and PM₁₀ monitors and dust deposition gauges at the residential areas as agreed by the Director-General; and
- s) a program to continue baseline monitoring undertaken prior to development consent.

The CAQMP and OAQMP shall be submitted for the approval of the Director-General, no later than one month prior to the commencement of construction and operation of the development, respectively, or within such period otherwise agreed by the Director-General. Construction or operation, as appropriate, shall not commence until written approval has been received from the Director-General. Upon receipt of the Director-General's approval, the Applicant shall supply copies of the CAQMP and OAQMP to Council, DEC, and DPI - Minerals, within 14 days. The Applicant shall make the CAQMP and OAQMP available for public inspection on request.

Air Quality and Dust Monitoring

6.11 ³⁰The Applicant shall submit to the DEC with a licence application a draft air monitoring program for long term PM₁₀, TSP and deposited matter emissions. The program must specify the data to be collected at regular intervals, continuously and during episodic periods relevant to specific operational and/or ambient conditions such that a representative picture of PM₁₀ TSP and deposited matter impacts at all receivers can be established. The monitoring must be conducted at a sufficient number of points to represent the wider area and account for possible weather (such as seasonal wind direction) and operational effects. The DEC will use the submitted draft monitoring program to include detailed licence conditions covering air monitoring locations, frequencies and methods. Monitoring locations for the mine operations, including sites for monitoring impacts of dust at the nearest non-mine owned residences and locations as may be determined to be necessary by the Director-General are to be decided in consultation with DEC. The sampling method, units of measure, interval and frequency of monitoring will be as set out in the *Approved Methods for the Sampling and Analysis of Air Pollutants in NSW*.

6.12 The Applicant shall:

- a) establish real-time ambient monitoring stations to provide continuous measurements of PM₁₀ concentrations at the closest residences for which no agreements have been negotiated.
- b) provide quarterly reporting during operation and rehabilitation of the open cut mine on the performance of the control measures and results of the ambient air quality monitoring system, unless otherwise agreed by the Director-General. The reports shall be provided to the Director-General, CCC and SSC within seven days of completion of the report; and
- c) provide all results and analysis of air quality monitoring in the AEMR.

6.13 ³¹The following points (to be each of or representative of a defined group of all potentially affected properties) referred to in the table below are identified for the purposes of monitoring and/or the setting of limits for the emission of pollutants to the air from the point.

³⁰ Incorporates DEC General Term of Approval

³¹ Incorporates DEC General Term of Approval

Air Monitoring

DEC Identification no.	Type of Monitoring Point	Type of Discharge Point	Description of Location
At locations to be determined by the DEC based on the monitoring plan required by condition 6.11	Ambient air monitoring		At locations to be determined by the DEC based on the monitoring plan required by condition 6.11

6.14 ³²For each monitoring point determined by the DEC at the licence application stage the applicant must monitor (by sampling and obtaining results by analysis) the concentration of each pollutant specified in Column 1 of the following table. The applicant must use the sampling method, units of measure, and sample at the frequency, specified opposite in the other columns:

Air

Pollutant	Units of Measure	Frequency	Sampling Method
Particulate Matter – PM ₁₀	µg/m ³	1 day in 6 or continuous	AM-18 or AS3580.9.8 – 2001
Total suspended particles	ug/m3	1 day in 6	AM-15
Particulates - Deposited Matter	g/m ² /month	Continuous	AM-19

6.15 ³³Monitoring for the concentration of a pollutant emitted to the air required to be conducted under this consent, or a licence under the Protection of the Environment Operations Act 1997, in relation to the development or in order to comply with a relevant local calculation protocol must be done in accordance with:

- any methodology which is required by or under the POEO Act 1997 to be used for the testing of the concentration of the pollutant; or
- if no such requirement is imposed by or under the POEO Act 1997, any methodology which the general terms of approval or a condition of the licence or the protocol (as the case may be) requires to be used for that testing; or
- if no such requirement is imposed by or under the POEO Act 1997 or by the general terms of approval or a condition of the licence or the protocol (as the case may be), any methodology approved in writing by the DEC for the purposes of that testing prior to the testing taking place.

Exceedence of Dust Criteria/Goals

6.16 In the event that:

- a) a landowner or occupier considers that dust from the project at his/her dwelling is in excess of the criteria detailed in Tables 1, 2, and 3 of condition 6.1 above; or,
- b) a landowner, having selected a suitable site for a dwelling on his/her vacant land, considers that dust from the project at his/her future dwelling would be in excess of the criteria detailed in Tables 1, 2, and 3 of condition 6.1 above,

³² Incorporates DEC General Term of Approval

³³ Incorporates DEC General Term of Approval

and the Director-General is satisfied that an investigation is required, the Applicant shall, upon the receipt of a written request:

- a) consult with the landowner or occupant affected to determine his/her concerns;
- b) make arrangements for, and bear the costs of, following consultation with other nearby mines, appropriate independent dust investigations in accordance with the OAQMP, and to the satisfaction of the Director-General, to quantify the impact and determine the source of the effect and contribution of the ACP mine;
- c) modify the mining activity or take other steps in accordance with the OAQMP if exceedences are demonstrated to result from ACP related activity. This shall include:
 - (i) introduction of additional dust controls, on individual sources or on all sources on the site, or modify operations to ensure that the dust criteria are achieved; and/or;
 - (ii) enter into an agreement with the landowner or provide such forms of benefit or amelioration of the impact of dust as may be agreed between the parties as providing acceptable compensation for the dust levels experienced. The agreement may also be made following consultation with other nearby mines.
- d) conduct follow up investigation(s) to the satisfaction of the Director-General, where necessary.

Note: Vacant land in this condition means the whole of the lot in a current plan registered at the Land Titles Office as at the date of this consent that does not have a dwelling situated on the lot and is permitted to have a dwelling on that lot.

- 6.17 If the independent dust investigations in condition 6.16 above confirm that ambient dust levels at the residence or proposed residence are in excess of the relevant criteria detailed in Tables 1 and 3 of condition 6.1 above, and if the measures in condition 6.16 c) (i) above do not reduce the dust levels below the criteria in Tables 1 and 3 of condition 6.1, or if agreement in accordance with condition 6.16 (c)(ii) above cannot be reached, the Applicant shall, at the written request of the owner, acquire the relevant property. Acquisition shall be in accordance with the procedures set out in conditions 11.5-11.11.

In the case of cumulative dust levels in excess of the criteria in Table 1 and 3 of condition 6.1, should the Applicant form an agreement with the relevant contributing parties under a Joint Acquisition Management Plan pursuant to Condition 11.12, the Applicant shall purchase an affected property in accordance with this Plan. Should a Joint Acquisition Management Plan not be prepared between the relevant contributing parties, the Applicant shall acquire the property in accordance with conditions 11.5-11.11.

- 6.18 If the independent dust investigations in condition 6.16 above confirm that ambient dust levels at the residence or proposed residence are in excess of the relevant criteria detailed in Table 2 of condition 6.1 above, and if the measures in condition 6.16 c) (i) above do not reduce the dust levels below the criteria in Table 2 of condition 6.1, or if agreement in accordance with condition 6.16 (c)(ii) above cannot be reached, the Applicant shall, assess ambient dust levels and the incremental contribution of ACP to ambient dust levels as set out in Table 4 below:

Table 4 Short Term Particulate Matter Acquisition Criteria

POLLUTANT	CRITERIA	AGENCY
Particulate matter < 10um (PM ₁₀)	50 ug/m ³ (incremental contribution of ACP to ambient levels)	NSW DEC
Particulate matter < 10um (PM ₁₀)	150 ug/m ³ (cumulative)	US EPA

If the independent dust investigations in condition 6.16 above confirm that ambient dust levels at the residence or proposed residence are in excess of either of the relevant criteria detailed in Table 4 above the Applicant shall, at the written request of the owner, acquire the relevant property. Acquisition shall be in accordance with the procedures set out in conditions 11.5-11.11.

In the case of cumulative dust levels in excess of the criteria in Table 4, should the Applicant form an agreement with the relevant contributing parties under a Joint Acquisition Management Plan pursuant to Condition 11.12, the Applicant shall purchase an affected property in accordance with this Plan. Should a Joint Acquisition Management Plan not be prepared between the relevant contributing parties, the Applicant shall acquire the property in accordance with conditions 11.5-11.11.

- 6.19 If continued complaints and dust investigations confirm that ambient air quality criteria in Table 2 of condition 6.1 are being exceeded, but are less than the ambient dust levels in Table 4 of condition 6.18, the Applicant shall continue to negotiate with the landowner, and other nearby mines where relevant, until a resolution to the satisfaction of the Director General is reached.
- 6.20 If a landowner disputes any dust mitigation or other measures proposed by the Applicant in accordance with condition 6.16 above, the matter shall be referred by either the Applicant or landowner to the Director-General in consultation with SSC. If the matter cannot be resolved within 21 days, the matter shall be referred to the Independent Dispute Resolution Process.
- 6.21 Further independent investigation(s) shall cease if the Director-General is satisfied that the relevant criteria in Tables 1, 2, and 3 of condition 6.1 are not being exceeded and are unlikely to be exceeded in the future.

Blast Management and Monitoring

Airblast Overpressure Criteria

6.22 ³⁴The Airblast overpressure level from blasting operations carried out in or on the premises must not exceed:

- (a) 115 dB(Lin Peak) for more than 5% of the total number of blasts during each reporting period; and
- (b) 120 dB (Lin Peak) at any time.

At any residence or other noise sensitive receiver such as the St Clements Anglican Church and Camberwell Community Hall.

Ground vibration (ppv) Criteria

6.23 ³⁵The ground vibration peak particle velocity from blasting operations carried out in or on the premises must not exceed:

- (a) 2 mm/s for more than 5% of the total number of blasts carried out in or on the premises during each reporting period; and
- (b) Exceed 10 mm/s at any time

At any residence or other noise sensitive receiver such as the St Clements Anglican Church and Camberwell Community Hall.

Time of blasting

6.24 ³⁶Blasting operations on the premises may only take place between 9.00am and 5.00pm Monday to Saturday inclusive.

6.25 The Applicant shall, as a minimum, advise residents of Camberwell village and occupiers of buildings within two (2) kilometres of blasting locations of future blasting events on at least a monthly basis, and of any changes to the proposed blast schedules. Such program shall also be available on the internet.

Blasting/Vibration Management Plans

6.26 The Applicant shall prepare and implement a Blasting/Vibration Management Plan (BVMP) in consultation with SSC, and to the satisfaction of the Director-General. The Plan shall include, but not be limited to, the following matters:

- a) demonstration of consistency with commitments made in documents listed in condition 1.2 and compliance with the conditions of this consent;
- b) demonstration of compliance blasting criteria;
- c) proposed mitigation measures;
- d) remedial action;

³⁴ Incorporates [DEC](#) General Term of Approval

³⁵ Incorporates [DEC](#) General Term of Approval

³⁶ Incorporates [DEC](#) General Term of Approval

- e) monitoring methods and program in accordance with blast monitoring and inspection conditions;
- f) monitoring program for flyrock distribution;
- g) measures to be undertaken to demonstrate that ACP is achieving best practice in minimising air blast overpressure, ground vibration levels, fumes and odours from blasting activities;
- h) measures to protect underground utilities (e.g.: subsurface telecommunication and electric cables, irrigation lines) and livestock on non-mine owned land;
- i) measures to consider the blasting activities from other neighbouring mines. This shall include details of the proposed measures to ensure that cumulative blast related impacts are managed, such as through consultation with the other mines to coordinate blasting activities;
- j) measures to monitor and mitigate impacts of blasting on rail and road infrastructure;
- k) measures to manage and mitigate dust generation from blasting;
- l) procedures for the investigation of blast related complaints from ACP, in consultation with other mines in the event of cumulative related impacts
- m) procedures for the notification of occupiers of buildings and residents prior to detonation of each blast; and
- n) measures to ensure no damage by flyrock to people, property, livestock and powerlines.

The BVMP shall be submitted for the approval of the Director-General, no later than one month prior to the commencement of blasting, or within such period otherwise agreed by the Director-General. Blasting shall not commence until written approval has been received from the Director-General. Upon receipt of the Director-General's approval, the Applicant shall supply a copy of the BVMP to Council, [DEC](#), and [DPI - Minerals](#) within 14 days. The Applicant shall make the BVMP available for public inspection on request.

6.27 The Applicant shall, in consultation with SSC, RTA and RIC, prepare and implement a Road and Rail Closure Management Plan (RRCMP) to the satisfaction of the Director-General. The Plan shall include, but not be limited to, the following matters:

- a) demonstration of consistency with commitments made in documents listed in condition 1.2 and compliance with the conditions of this consent;
- b) details of the proposed safety management measures during the period of the road closure and blast;
- c) details of the procedures for closing Glennies Creek Road the railway and the New England Highway, and the period which they will be closed during blasting activities;
- d) methods for ensuring the safety of road and rail users and the general public during the blast period;

- e) strategies for informing road and rail users and the local community of the proposed closures;
- f) details of the procedures for permitting the passage of emergency vehicles during the road closure. This shall also include details of the proposed methods for sufficiently notifying emergency service providers of the proposed times and period of the road closures;
- g) methods for clearing any debris resulting from a blast; and
- h) details of the disruptions that are likely to occur during the closure period.

The RRCMP shall be submitted for the approval of the Director-General, no later than one month prior to the commencement of blasting, or within such period otherwise agreed by the Director-General. Blasting shall not commence until written approval has been received from the Director-General. Upon receipt of the Director-General's approval, the Applicant shall supply a copy of the RRCMP to Council, RIC, RTA, [DEC](#), and [DPI - Minerals](#) within 14 days. The Applicant shall make the RRCMP available for public inspection on request.

Blast Monitoring and Inspection

6.28 ³⁷To determine compliance with airblast overpressure and ground vibration criteria:

- a) Airblast overpressure and ground vibration levels must be measured at the most potentially affected residence or other noise sensitive receiver for all blasts carried out at the development; and
- b) Instrumentation used to monitor compliance must meet the requirements of Australian Standard 2187.2 of 1993.

The results of the blast monitoring must be submitted to [DEC](#) at the end of each reporting period and be summarised and interpreted in the AEMR.

6.29 The Applicant shall investigate any vibration problem(s) associated with above ground floor level of residential buildings which occur as a result of blasting at the mine in relation to the criteria in Conditions 6.22 and 6.23 above. Should such an investigation be necessary the Applicant shall advise the Director-General the result of such investigation and any proposed preventive/remedial measures.

6.30 Upon written request of the owner of any dwellings located in Camberwell Village or within two (2) kilometres of the blasting locations, the Applicant shall arrange at its own costs, for the inspection by a technically qualified person agreed to by both parties, to record the material condition of any structure on such property within 14 days of receipt of the request. The Applicant shall supply a copy of any inspection report, certified by the person who undertook the inspection, to the relevant property owner within fourteen (14) days of receipt of the report.

6.31 The Applicant shall arrange at its own costs, for the inspection by a technically qualified person agreed to by the Director-General, to record the material condition of the St Clements Anglican Church and Camberwell Community Hall prior to the commencement of blasting. The Applicant shall supply a copy of any inspection report, certified by the person who undertook the inspection, to the relevant property owner and the Director-General within fourteen (14) days of receipt of the report.

³⁷ Incorporates [DEC](#) General Term of Approval

6.32 Upon receipt of a written request from the relevant property owner or manager, the Applicant shall investigate any blasting impacts or exceedences of blast criteria associated with the development at the St Clements Anglican Church or Camberwell Community Hall. Should such an investigation be necessary the Applicant shall advise the Director-General the result of such investigation and any proposed preventive/remedial measures.

6.33 The Applicant shall incur the costs for any damage to Glennies Creek Road, the Railway, and the New England Highway resulting from any blast related activities. The repairs shall be undertaken to a standard acceptable to SSC, RTA and RIC.

Noise Control

Noise Criteria

6.34 ³⁸Except as may be expressly provided by a DEC licence, noise generated by the development must not exceed the limits specified in Table 5 below.

Table 5 Noise Limits (dB(A))

Location	Day	Evening	Night	
	L _{Aeq} (15 minute)	L _{Aeq} (15 minute)	L _{Aeq} (15 minute)	L _{A1} (1 minute)
Any residence not owned by the Applicant or not subject to an agreement between the Applicant and the residence owner as to an alternate noise limit.	38	38	36	46

6.35 The Applicant shall ensure that the design, construction and operation of the ACP shall not create amenity problem(s) associated with low frequency vibration. In the event of a problem arising the Applicant shall, in consultation with the DEC, investigate the cause of any low frequency vibration associated with the ACP and report to the Director-General the result of any such investigation and practical mitigation measures that can be adopted to eliminate such problem.

Noise Acquisition Criteria

6.36 The acquisition zone for noise is defined by predicted or demonstrated exceedence of the noise levels shown in Table 6 below:

³⁸ Incorporates DEC General Term of Approval

Table 6 Acquisition Noise Limits (dB(A))

Location	Day	Evening	Night
	L _{Aeq(15 minute)}	L _{Aeq(15 minute)}	L _{Aeq(15 minute)}
Any residence not owned by the Applicant or not subject to an agreement between the Applicant and the residence owner as to an alternate noise limit.	43	43	41

Interpretation of Noise Levels

6.37 ³⁹For the purpose of Conditions 6.34 and 6.36:

- Day is defined as the period from 7am to 6pm Monday to Saturday and 8am to 6pm Sundays and Public Holidays,
- Evening is defined as the period from 6pm to 10pm
- Night is defined as the period from 10pm to 7am Monday to Saturday and 10pm to 8am Sundays and Public Holidays.

6.38 ⁴⁰Noise from the premises is to be measured at the most affected point on or within the residential boundary or at the most affected point within 30m of the dwelling where the dwelling is more than 30m from boundary to determine compliance with the L_{Aeq(15 minute)} noise limits in condition 6.34. Where it can be demonstrated that direct measurement of noise from the premises is impractical, the DEC may accept alternative means of determining compliance. See Chapter 11 of the NSW Industrial Noise Policy. The modification factors presented in Section 4 of the NSW Industrial Noise Policy shall also be applied to the measured noise level where applicable.

6.39 ⁴¹Noise from the premises is to be measured at 1m from the dwelling façade to determine compliance with the L_{A1(1 minute)} noise limits in condition 6.34.

6.40 ⁴²The noise emission limits identified in condition 6.34 apply under the following meteorological conditions:

- a) wind speeds up to 3m/s at 10 metres above ground level; and
- b) temperature inversion conditions of up to 3°C/100m.

Hours of Operation

6.41 ⁴³Open cut mining activities must only be conducted between 7am to 10pm Monday to Saturday and 8am to 10pm Sundays and Public Holidays.

³⁹ Incorporates DEC General Term of Approval

⁴⁰ Incorporates DEC General Term of Approval

⁴¹ Incorporates DEC General Term of Approval

⁴² Incorporates DEC General Term of Approval

⁴³ Incorporates DEC General Term of Approval

Noise Management Plans

6.42 The Applicant shall prepare and implement, a Construction Noise Management Plan (CNMP) in consultation with SSC, to the satisfaction of the Director-General. The Plan shall include, but not be limited to the following matters:

- a) demonstration of consistency with commitments made in documents listed in condition 1.2 and compliance with the conditions of this consent;
- b) compliance standards;
- c) community consultation;
- d) complaints handling monitoring/system;
- e) site contact person to follow up complaints;
- f) methods for the management of construction related traffic noise impacts;
- g) mitigation measures;
- h) the design/orientation of the proposed mitigation methods demonstrating best practice;
- i) construction times;
- j) contingency measures where noise complaints are received; and
- k) monitoring methods and program to comply with requirements of conditions 6.44-6.48.

The CNMP shall be submitted for the approval of the Director-General, no later than one month prior to the commencement of construction, or within such period otherwise agreed by the Director-General. Construction shall not commence until written approval has been received from the Director-General. Upon receipt of the Director-General's approval, the Applicant shall supply a copy of the CNMP to Council, [DEC](#), and [DPI - Minerals](#) within 14 days. The Applicant shall make the CNMP available for public inspection on request.

6.43 The Applicant shall prepare and implement a Noise Management Plan (NMP) for the ACP mine, to the satisfaction of the Director-General. The [DEC](#), SSC, and nearby mines shall be consulted prior to the finalisation of the Noise Management Plan. The Plan shall include:

- a) demonstration of consistency with commitments made in documents listed in condition 1.2 and compliance with the conditions of this consent;
- b) details of the methods to comply with requirements of conditions 6.44-6.48;
- c) details regarding operating configuration; determining survey intervals; weather conditions and seasonal variations; selecting variations, locations, periods and times of measurements;
- d) detail management measures where the target criteria in condition 6.34 of this consent are predicted to be exceeded, or are exceeded during mining operations;
- e) redefine both the acquisition and management zones on a yearly basis in the AEMR, unless otherwise agreed by the Director-General. This review shall draw upon the noise monitoring results obtained during the previous year and

- incorporate noise modelling to provide a forward plan of predicted noise levels for the year ahead;
- f) specify the procedures for a noise monitoring program for the purpose of undertaking independent noise investigations;
 - g) outline the procedure to notify property owners and occupiers likely to be affected by noise from the operations;
 - h) establish a protocol for handling noise complaints that include recording, reporting and acting on complaints, particularly where complaints are received and it is demonstrated noise levels are in excess of the criteria contained in this consent;
 - i) record appropriate mechanisms for community consultation;
 - j) outline proactive/predictive and reactive mitigation measures to be employed on the site to limit noise emissions;
 - k) identify longer term strategies directed towards mitigating noise levels that exceed the noise target levels in condition 6.34;
 - l) outline measures to reduce the impact of intermittent, low frequency and tonal noise (including truck reversing alarms);
 - m) survey and investigate noise reduction measures from plant and equipment annually, subject to noise monitoring results and/or complaints received, and report in the AEMR at the conclusion of the first 12 months of operations and set targets for noise reduction taking into consideration valid noise complaints in the previous year; and
 - n) include details of the inter-relationship of this plan with Noise Management Plans of other mines in the area.

The NMP shall be submitted for the approval of the Director-General, no later than one month prior to the commencement of mining operations, or within such period otherwise agreed by the Director-General. Mining operations shall not commence until written approval has been received from the Director-General. Upon receipt of the Director-General's approval, the Applicant shall supply a copy of the NMP to Council, [DEC](#) and [DPI - Minerals](#) within 14 days. The Applicant shall make the NMP available for public inspection on request.

6.43A Within 1 month of placing overburden on the eastern emplacement area above RL 125 metres, the Applicant shall revise the Noise Management Plan to include a dumping strategy for the eastern emplacement area to minimise noise impacts and ensure compliance with the noise criteria in the consent, to the satisfaction of the Director-General.

Noise Monitoring

6.44 The Applicant shall conduct detailed noise monitoring surveys at potentially affected residences (including potentially affected residences to the east of the mine prior to the cessation of overburden emplacement activities on the eastern emplacement area), on a 3-monthly basis, to the satisfaction of the Director-General.

6.45 ⁴⁴A noise compliance assessment report shall be submitted to [DEC](#) and the Director-General within three months of commencement of normal operations at the premises and on an annual basis thereafter. The report shall be prepared by an accredited acoustical consultant and shall determine compliance with the noise limits in condition 6.34. Annual noise compliance reports may be incorporated into the AEMR.

⁴⁴ Incorporates [DEC](#) General Term of Approval

- 6.46 ⁴⁵Noise from the premises is to be measured at the most affected point on or within the residential boundary or at the most affected point within 30m of the dwelling where the dwelling is more than 30m from boundary to determine compliance with the $L_{Aeq(15 \text{ minute})}$ noise limits in condition 6.34. Where it can be demonstrated that direct measurement of noise from the premises is impractical, the DEC may accept alternative means of determining compliance. See Chapter 11 of the NSW Industrial Noise Policy. The modification factors presented in Section 4 of the NSW Industrial Noise Policy shall also be applied to the measured noise level where applicable.
- 6.47 ⁴⁶Noise from the premises is to be measured at 1m from the dwelling façade to determine compliance with the $L_{A1(1 \text{ minute})}$ noise limits in condition 6.34.
- 6.48 Noise monitoring results shall be of sufficient detail to assess whether ACP noise contains low-frequency, tonal or impulsive components as defined in Section 4 of the INP.

Exceedence of Noise Criteria

6.49 In the event that:

- a) a landowner or occupier considers that noise from the project at his/her dwelling is in excess of the criteria detailed in Table 5 of condition 6.34 above; or,
- b) a landowner, having selected a suitable site for a dwelling on his/her vacant land, considers that noise from the project at his/her future dwelling would be excess of the criteria detailed in Table 5 of condition 6.34 above,

and the Director-General is satisfied that an investigation is required, the Applicant shall, upon the receipt of a written request:

- a) consult with the landowner or occupant affected to determine his/her concerns;
- b) make arrangements for, and bear the costs of, following consultation with other mine operations in the vicinity where necessary, appropriate independent noise investigations in accordance with the Noise Management Plan, and to the satisfaction of the Director-General, to quantify the impact and determine the source of the effect and the contribution of ACP to the effect;
- c) take steps in accordance with a noise reduction plan prepared as part of the Noise Management Plan, if exceedances are demonstrated to result from ACP. This shall include:
 - (i) introduction of additional controls, either on noise emission from individual sources on the site or on site operations or modify operations, to ensure that the criteria in the Table 5 of condition 6.34 above are achieved, as far as possible; or
 - (ii) with the agreement of the landowner, and in the case of cumulative impacts the other relevant mining operations, undertaking of noise control at the dwelling to achieve internal noise levels due to ACP alone or due to all mining activities, as relevant, which are at least 10dBA below the relevant external noise criterion in Table 5 of condition 6.34. Internal noise levels should be measured at the centre of any habitable room; or

⁴⁵ Incorporates DEC General Term of Approval

⁴⁶ Incorporates DEC General Term of Approval

- (iii) entering into an agreement with the landowner, and in the case of cumulative impacts the other relevant mining operations in the area and the landowner, to provide such other forms of benefit or amelioration of the impacts of noise as may be agreed between the parties, as providing acceptable compensation for the noise levels experienced;
- d) conduct follow up investigation(s) to the satisfaction of the Director-General, where necessary.

Note: Vacant land in this condition means the whole of the lot in a current plan registered at the Land Titles Office as at the date of this consent that does not have a dwelling situated on the lot and is permitted to have a dwelling on that lot.

- 6.50 If the independent noise investigation(s) in condition 6.49 above confirms that noise criteria in condition 6.36 are being exceeded, and the measures in condition 6.49(c) do not reduce the noise levels below the criteria in Table 5 of condition 6.34, or establish an agreement acceptable to the relevant parties, the Applicant shall, at the written request of the landowner, acquire the relevant property. Acquisition shall be in accordance with the procedures set out in conditions 11.5-11.11.

In the case of cumulative levels in excess of the criteria in Table 6 of condition 6.36, should the Applicant form an agreement with the relevant contributing parties under a Joint Acquisition Management Plan pursuant to Condition 11.12, the Applicant shall purchase an affected property in accordance with this Plan. Should a Joint Acquisition Management Plan not be prepared between the relevant contributing parties, the Applicant shall acquire the property in accordance with conditions 11.5-11.11.

- 6.51 If continued complaints and noise investigations confirm that noise criteria in Table 5 of condition 6.34 are being exceeded, but are less than the noise levels in condition 6.36, the Applicant shall continue to negotiate with the landowner, and other mines in the vicinity where relevant, until a resolution to the satisfaction of the Director General is reached.
- 6.52 If a landowner disputes any noise mitigation or other measures proposed by the Applicant in accordance with condition 6.49 above, the matter shall be referred by either the Applicant or landowner to the Director-General in consultation with SSC. If the matter cannot be resolved within 21 days, the matter shall be referred to the Independent Dispute Resolution Process.
- 6.53 Further independent investigations shall cease if the Director-General is satisfied that the relevant criteria in Table 5 of condition 6.34 are not being exceeded and are unlikely to be exceeded in the future.

Lighting Emissions

- 6.54 All external lighting associated with the development shall comply with Australian Standard *AS4282(INT) 1995 - Control of Obtrusive Effects of Outdoor Lighting*. Prior to the commencement of mining operations, the Applicant shall certify in writing, to the satisfaction of the Director-General, that all relevant lighting associated with the development will meet the requirements of this condition, and has generally been designed and installed to minimise lighting impacts outside the site.

- 6.55 The Applicant shall design and construct all roads and areas where mobile equipment and vehicles move on the site to minimise off-site lighting impacts from equipment lighting and headlights. Lighting from equipment and vehicles shall not shine directly on residences or vehicles moving along public roads at any time.
- 6.56 The Applicant shall prepare a Lighting Management Plan (LMP) in consultation with SSC, and to the satisfaction of the Director-General. The Plan shall include, but not be limited to:
- a) demonstration of consistency with commitments made in documents listed in condition 1.2 and compliance with the conditions of this consent;
 - b) details of the implementation of visual controls to screen, direct or manage all on-site lighting from mine related activities in respect of residences and roadways;
 - c) details of the planting of vegetation screens along the mine boundary and around surface facilities and infrastructure;
 - d) details of technical measures and work practices necessary to minimise the spillage of light from areas to be illuminated, and to minimise the total night time glow from the mine;
 - e) details of the construction of mine facilities roads, and work areas, or placement of visual screens and/or overburden emplacements to screen lighting impacts;
 - f) details of the proposed process and measures to address complaints that may be received from residents or road users impacted by lighting from the mine site; and,
 - g) details of any other effective operating practices to manage potential lighting impacts.

The LMP shall be submitted for the approval of the Director-General, no later than one month prior to the commencement of mining operations, or within such period otherwise agreed by the Director-General. Mining operations shall not commence until written approval has been received from the Director-General. Upon receipt of the Director-General's approval, the Applicant shall supply a copy of the LMP to Council, [DEC](#), and [DPI - Minerals](#) within 14 days. The Applicant shall make the LMP available for public inspection on request.

- 6.57 The Applicant shall report on the effectiveness of the lighting emission controls in the AEMR.

7. TRANSPORT AND UTILITIES

Road Transport

- 7.1 No coal shall be hauled from the mine site on public roads, except under emergency circumstances and with the prior written approval of the Director-General and SSC.
- 7.2 The Applicant shall ensure that all employees and contractors travelling to and from the mine site utilise the designated mine access road off Glennies Creek Road.
- 7.3 Any damage caused to the New England Highway pavement and shoulder caused by the movement of heavy vehicles for oversize equipment deliveries to the site shall be repaired at the Applicant's expense.
- 7.4 No coal shall be transported via any internal haul road to the Macquarie Generation conveyor as indicated in the EIS.

Note: Condition 1.19 prohibits the construction of the private coal haul road.
--

Road Construction

Local Roads

- 7.5 ⁴⁷The Applicant shall design and construct the following works in accordance with Council's *Development Design and Construction Specifications*:
 - a) widen the radius of Glennies Creek Road at the New England Highway intersection to overcome the acute intersection angle;
 - b) reseal the Glennies Creek Road surface from the New England Highway to the proposed mine entry road;
 - c) construct an AUSTROADS type B intersection incorporating a left turn speed reducing lane to the new entry, and widen the eastern side of Glennies Creek Road to allow a right turn ingress lane from the intersection and an external slip lane for Glennies Creek Road; and,
 - d) build a new realigned section of road to accommodate the new open cut mine.

Plans for all works shall be submitted and approved by Council prior to commencement of works.

- 7.6 The Applicant will construct upgrade works on Glennies Creek Road in accordance with the conceptual design provided in supplementary information referred to in condition 1.2, with the exception that the design standard is to be upgraded to 80kph. All works to be to the satisfaction of SSC.

State Roads

- 7.7 The Applicant shall obtain approval from the RTA for the upgrade of the intersection at Glennies Creek Road and the New England Highway, which shall be generally in accordance with the conceptual design provided in supplementary information referred to in condition 1.2.

⁴⁷ Incorporates Singleton Shire Council General Term of Approval

- 7.8 The Applicant shall obtain RTA approval under Section 138 of the Roads Act for all works within the New England Highway road reserve.
- 7.9 ⁴⁸The Applicant shall execute a [Works Authorisation](#) Deed with the RTA for the proposed road works on State Highway No. 9 New England Highway. The [Works Authorisation](#) Deed must be executed prior to commencement of any activity within the Highway road reserve.
- 7.10 ⁴⁹The Applicant shall bear all costs associated with the design, survey, approval, construction, maintenance, monitoring, rehabilitation and removal of all mine related infrastructure and works affecting the New England Highway road reserve.
- 7.11 ⁵⁰The Applicant shall pay to the RTA the cost incurred by the RTA of making good any damage to the New England Highway, and its associated structures, caused by activities associated with this consent. Provided however that the amount to be paid by the Applicant as aforesaid shall be reduced by such sum of money, if any, as may be paid to the RTA from the Mine Subsidence Compensation Fund constituted under the Mine Subsidence Compensation Act, 1961, in the form of a claim for compensation for the same damage.
- 7.12 ⁵¹Activities associated with this consent shall not restrict in any way the ability of the RTA and its contractors to access and/or undertake works to Bowmans Creek Bridge and its underside.
- 7.13 ⁵²Any adjustments or alterations to activities associated with this consent resulting from improvements/upgrade of the New England Highway shall be the responsibility of the Applicant and at no cost to the RTA.

7.22 The Applicant shall maintain signs on Glennies Creek Road and in Camberwell Village to provide at least 24 hours notice of temporary road closures. The location and wording of the signs are to be approved by SSC. Timetables for road closures are also to be available on the internet. A protocol is to be established in consultation with the emergency services during road closures. Notification shall also be provided to relevant emergency services via fax or other written means seven (7) days prior to the road closure.

Relocation of Electrical Transmission Lines

7.23 The Applicant shall, to the satisfaction of Energy Australia and at its own cost, undertake the relocation and/or construction of any electrical transmission lines which may be required as a result of the development. The Applicant shall also bear any costs associated with relocation of Registered Easements for relocated or new transmission lines required as a result of the development. Such work shall be completed prior to any existing line being affected by mining activity from ACP.

Utility Services

7.24 The Applicant shall, to the satisfaction of telecommunications providers and at its own cost, or by agreement with relevant parties, undertake the relocation of any telecommunications cables which may be required as a result of the development.

Rail Construction

7.25 The Applicant shall construct the proposed railway siding to the satisfaction of RIC and at its own costs.

8. MONITORING / AUDITING

- 8.1 In addition to the requirements contained elsewhere in this consent, the Director-General may, at any time in consultation with the relevant government authorities and Applicant, require the monitoring programs under this consent to be revised or updated to reflect changing environmental circumstances or changes in technology/operational practices. Changes shall be made and approved in the same manner as the initial monitoring programs. All monitoring programs shall also be made publicly available at SSC and on the internet within two weeks of approval by the relevant government authority.
- 8.2 All sampling strategies and protocols undertaken as part of any monitoring program shall include a quality assurance/quality control plan and shall be included in the relevant environmental management plan. Only accredited laboratories shall be used for laboratory analysis.

Third Party Monitoring / Auditing

Independent Expert Review

- 8.3 The Director-General may, in consultation with [DEC](#), [DPI - Fisheries](#), SSC, and other relevant agencies, direct the Applicant to, at the Applicant's own costs, provide ongoing funding for Independent Expert Review of documents, plans, and monitoring programs required by this consent. Independent expert(s) may be required provide independent advice to the Director-General, and through the Director-General to other regulatory authorities. The payments shall be paid according to a schedule specified by the Director-General, should Independent Expert Review be required.
- 8.4 Independent Expert Review shall be carried out by one or more independent experts in relevant disciplines and may include experts in subsidence, water quality / quantity, ecology, groundwater, air quality, noise, or cultural heritage. The Director-General shall select the relevant discipline(s) and appoint the expert(s) in consultation with relevant Government agencies and the Applicant.
- 8.5 The functions of any Independent Expert Review may include, but not be limited to, assessing and evaluating the following documents required under this consent:
- a) Environmental Management Plans;
 - b) Monitoring programs and compliance reports;
 - c) Subsidence Monitoring and Impact Assessment Reports; and,
 - d) Annual Environmental Management Reports.
- 8.6 The results of any review, including any specific recommendations, shall be submitted to the Director-General, [DEC](#), [DPI - Fisheries](#), [DPI - Minerals](#), and other relevant agencies to be determined by the Director-General. Reports produced by a review shall be made public.
- 8.7 The Director-General may, after considering any submission made as a result of an Independent Expert Review, notify the Applicant of any requirements with regard to any recommendations made in the submission. The Applicant shall comply with those requirements within such time as the Director-General may require.

Independent Environmental Auditing

- 8.8 One year after commencement of construction and every three years thereafter until five years after completion of mining in the DA area, or as otherwise directed by the Director-General, the Applicant shall conduct an environmental audit of the mining and infrastructure areas of the development in accordance with ISO 14010 - Guidelines and General Principles for Environmental Auditing, and ISO 14011 - Procedures for Environmental Auditing (or the current versions), and in accordance with any specifications required by the Director-General. Copies of the report shall be submitted by the Applicant to the Director-General, SSC, [DEC](#), [DIPNR](#), [DPI - Minerals](#), RTA, [DPI - Fisheries](#), MSB, [DPI - Agriculture](#) and the CCC within two weeks of the report's completion for comment.
- 8.9 The independent environmental audit shall:
- a) assess compliance with the requirements of this consent, licences, and approvals;
 - b) assess the development against the predictions made in the EIS and the predictions and commitments made in the documents listed in condition 1.2;
 - c) assess the development against predictions made in SMIARs required under conditions 3.24-3.28.
 - d) review the effectiveness of the environmental management of the mine, including any mitigation works;
 - e) be carried out at the Applicant's expense; and
 - f) be conducted by a duly qualified independent person or team approved by the Director-General in consultation with SSC and other relevant agencies.
- 8.10 The Director-General may, after considering any submission made by the relevant government agencies, SSC and the CCC on the report, notify the Applicant of any requirements with regard to any recommendations in the report. The Applicant shall comply with those reasonable requirements within such time as the Director-General may require.

Meteorological Station(s)

- 8.11 The Applicant shall establish a meteorological station(s) at a relevant location(s) in accordance with the requirements of AS 2922 1987 "Ambient Air Guide for Siting of Sampling Units" or its updated version or as directed by the [DEC](#). The Meteorological station(s) must be capable of recording wind direction and speed, temperature and sigma theta and be operated in accordance with the requirements of AS 2923-1987 "Ambient Air Guide Horizontal Wind for Air Quality Application", or subsequent relevant standards.

8.12 ⁵⁹The Applicant must monitor (by sampling and obtaining results by analysis) the parameters specified in Column 1. The applicant must use the sampling method, units of measure, averaging period and sample at the frequency, specified opposite in the other columns:

Parameter	Units of measure	Averaging Period	Frequency	Method
Rainfall	mm/hr	1-hour	Continuous	AM-4
Sigma Theta @ 10 m	°	1-hour	Continuous	AM-2
Siting	-	-	-	AM-1
Temperature @ 10 m	K	1-hour	Continuous	AM-4
Temperature @ 2 m	K	1-hour	Continuous	AM-4
Atmospheric inversion	°C/100m		Continuous	See note
Total Solar Radiation @ 10 m	W/m ²	1-hour	Continuous	AM-4
Wind Direction @ 10 m	°	1-hour	Continuous	AM-2
Wind Speed @ 10 m	m/s	1-hour	Continuous	AM-2

Note: The Applicant shall calculate temperature inversion from measurements at 2 and 10m.

⁵⁹ Incorporates [DEC](#) General Term of Approval

9. REPORTING

Reports on Operations

9.1 The Applicant shall report on mine operations in accordance with the mine operations plan (refer to Condition 2.1).

Annual Environmental Management Report (AEMR)

9.2 The Applicant shall, throughout the life of the mine and for five years after completion of mining in the DA area, prepare and submit an Annual Environmental Management Report (AEMR) to the satisfaction of the Director-General and [DPI - Minerals](#). The AEMR shall review the performance of the mine against the Environmental Management Strategy and the relevant Mining Operations Plans, the conditions of this consent, and other licences and approvals relating to the mine. To enable ready comparison with the predictions made in the EIS, diagrams and tables, the report shall include, but not be limited to, the following matters:

- a) an annual compliance audit of the performance of the project against conditions of this consent and statutory approvals;
- b) assess the development against the predictions made in the EIS and the terms and commitments made in the documents listed in condition 1.2;
- c) assess the development against predictions made in SMIARs required under conditions 3.24-3.28;
- d) ⁶⁰a Groundwater Management Report prepared by an independent expert to the satisfaction of [DIPNR](#), addressing:
 - (i) work done under and the level of compliance with, the groundwater management measures defined in the Groundwater Management Plan; and
 - (ii) identification of trends in groundwater monitoring data and comparison with predictions, in documents referred to in condition 1.2 and any previous SMIARs, over the life of mining operations.
- e) a review of the effectiveness of the environmental management of the mine in terms of [DEC](#), [DIPNR](#), [DPI - Minerals](#), and SSC requirements;
- f) results of all environmental monitoring required under this consent or other approvals, including interpretations and discussion by a suitably qualified person;
- g) reporting requirements under condition 3.31;
- h) identify trends in monitoring results over the life of the mine;
- i) an assessment of any changes to agricultural land suitability resulting from the mining operations, including cumulative changes;
- j) a listing of any variations obtained to approvals applicable to the DA area during the previous year;
- k) the outcome of the mine water balance for the year;

⁶⁰ *(deleted)*

- l) status of rehabilitation and revegetation works; and
- m) environmental management targets and strategies for the next year, taking into account identified trends in monitoring results.

9.3 In preparing the AEMR, the Applicant shall:

- a) consult with the Director-General during preparation of each report;
- b) comply with any reasonable requirements of the Director-General or other relevant government agency; and
- c) ensure that the first report is completed and submitted within twelve months of this consent, or at a date determined by the Director-General in consultation with the [DPI - Minerals](#) and the [DEC](#).

9.4 The Applicant shall ensure that copies of each AEMR are submitted at the same time to the Director-General, [DPI - Minerals](#), [DEC](#), [DIPNR](#), [DPI - Fisheries](#), SSC and the CCC, and made available for public information at SSC within fourteen days of submission to these authorities.

Recording and Reporting Requirements

Monitoring Records

9.5 ⁶¹The results of any monitoring required to be conducted by the [DEC's](#) general terms of approval, or a licence under the Protection of the Environment Operations Act 1997, in relation to the development or in order to comply with any load calculation protocol must be recorded and retained as set out in conditions 9.6 and 9.7.

9.6 ⁶²All records required to be kept by the licence must be:

- in a legible form, or in a form that can readily be produced to a legible form;
- kept for at least 4 years after the monitoring or event to which they relate took place; and
- produced in a legible form to any authorised officer of the [DEC](#) who asks to see them.

9.7 ⁶³The following records must be kept in respect of any samples required to be collected:

- the date(s) on which the sample was taken;
- the time(s) at which the sample was collected;
- the point at which the sample was taken; and
- the name of the person who collected the sample.

9.8 ⁶⁴The Applicant must provide an annual return to the [DEC](#) in relation to the development as required by any licence under the Protection of the Environment Operations Act 1997 in relation to the development. In the return the Applicant must report on the annual monitoring undertaken (where the activity results in pollutant

⁶¹ Incorporates [DEC](#) General Term of Approval

⁶² Incorporates [DEC](#) General Term of Approval

⁶³ Incorporates [DEC](#) General Term of Approval

⁶⁴ Incorporates [DEC](#) General Term of Approval

discharges), provide a summary of complaints relating to the development, report on compliance with licence conditions and provide a calculation of licence fees (administrative fees and, where relevant, load based fees) that are payable. If load based fees apply to the activity the applicant will be required to submit load-based fee calculation worksheets with the return. This may form part of the AEMR.

10. COMMUNITY CONSULTATION / OBLIGATIONS

Community Consultative Committee

10.1 The Applicant shall:

- a) establish a Community Consultative Committee (CCC) and aim to hold the first meeting prior to submission of the Environmental Management Strategy. Should the CCC not be formed at the preparation of the Environmental Management Strategy or environmental management plans, the Applicant shall consult the CCC, once formed, on the Strategy and any management plans. The Applicant shall provide a report to the Director-General on the issues raised as a result of these consultations and the Director-General may require the Environmental Management Strategy or environmental management plans be revised in light of this report. Selection of representatives shall be to the satisfaction of the Director-General in consultation with the Applicant and SSC. The CCC shall comprise two (2) representatives of the Applicant (including the Environmental Officer), one (1) representative of SSC, and four (4) community representatives. The CCC shall be chaired by SSC.
- b) representatives from relevant government agencies, the local community, the local Aboriginal community, or other individuals may be invited to attend meetings as required by the Chairperson. The CCC may make comments and recommendations about the preparation and implementation of environmental management plans, monitor compliance with conditions of this consent relevant to the operation of the mine during the term of the consent. The Applicant shall ensure that the CCC has reasonable access to the necessary plans for such purposes. The Applicant shall consider the recommendations and comments of the CCC and provide a response to the CCC and Director-General.

10.2 The Applicant shall, at its own expense:

- (i) nominate two (2) representatives (including the Environmental Officer) to attend all meetings of the CCC;
- (ii) provide to the CCC regular information on the progress of work and monitoring results;
- (iii) promptly provide to the CCC such other information as the Chair of the CCC may reasonably request concerning the environmental performance of the development;
- (iv) provide access for site inspections by the CCC; and
- (v) provide meeting facilities for the CCC, and take minutes of CCC meetings. These minutes shall be available for public inspection at SSC within 14 days of the meeting, or as agreed by the CCC.

Complaint Handling Procedures

10.3 The Environmental Officer(s) employed by the mine (refer condition 3.1) shall be responsible for:

- a) establishing and maintaining a system for recording complaints with respect to construction works and mine operations on a dedicated and publicly advertised telephone line, 24 hours per day 7 days per week, entering complaints or comments in an up to date log book, or other suitable data base, and ensuring that an initial response is provided to the complainant within 24 hours;

- b) for providing a report of complaints received with respect to the construction and operation of the mine, every six months throughout the life of the project to the Director-General, SSC, [DEC](#), [DPI - Minerals](#), and the CCC, or as otherwise agreed by the Director-General. A summary of this report shall be included in the AEMR (conditions 9.2-9.4);
- c) maintaining access to documents on the ACP internet site, as required by this consent, and publicizing the address to the site to the public and regulatory authorities;
- d) consult with the environmental officer(s) employed by other mines in the vicinity to seek to co-ordinate a response to any complaints received regarding the operations of ACP and other mines.

10.4 ⁶⁵The Applicant must nominate at least two persons (and their telephone numbers) who will be available to the [DEC](#) on a 24 hours basis, and who have authority to provide information and to implement such measures as may be necessary from time to time to address a pollution incident or to prevent pollution from continuing as directed by an authorised officer of the [DEC](#).

⁶⁵ Incorporates [DEC](#) General Term of Approval

11. PROPONENTS OBLIGATIONS

Cumulative Impact Management

- 11.1 In the event that the cumulative impact of noise or dust contributed to by the operation of the ACP mine and other nearby mining activities and any future mining/industrial operations, at dwellings, or proposed dwellings on vacant land (as described in Condition 6), in the vicinity of the operation, exceeds the noise or dust criteria contained in condition 6, the Applicant shall negotiate with the other mines and landowner(s) to determine appropriate arrangements to reasonably contribute to the management of the identified cumulative impacts or acquisition of the property to the satisfaction of the Director-General in proportion to their contributions to the impact.
- 11.2 If it is identified that total industrial noise levels at any point exceed the criteria set out in Condition 6.34, and that an industrial source from within the mine contributes significantly to this total, the Applicant shall prepare a report to the Director-General outlining the contribution from sources within the mine to the total measured noise level.
- 11.3 If agreement on appropriate contributions towards mitigation measures/acquisition cannot be reached from negotiations undertaken in accordance with condition 11.1, then the matter shall be referred to the Director-General in consultation with SSC by either the Applicant or landowner. If the matter is not resolved within 21 days of the referral, the matter will be referred to an Independent Dispute Resolution Process as determined by the Director-General, and resolved as agreed by the Director-General. The Independent Dispute Resolution Process shall determine the responsibilities of each of the mining companies in accordance with condition 11.1 above and actions to be undertaken. The decision of the Independent Dispute Resolution Process shall be final and binding on all parties, as agreed by the Director-General.
- 11.4 Prior to referral to the Independent Dispute Resolution Process, the Applicant shall provide the Director-General a report detailing the Applicant's reasons for being unable to reach agreement with the other ACP parties, and the reasons for the criteria exceedences with demonstration that ACP's activities are not the sole cause of the exceedences.

Area of Affectation – Land Acquisition

<p>Note: In Conditions 11.5-11.11 "land" means the whole of a lot in a current plan registered at the Land Titles Office as at the date of this consent.</p>

- 11.5 The Applicant shall negotiate and purchase property No. 115 as identified within the EIS (Volume 3 Figure 3.13), within six (6) months of a written request from the affected land owner. The owner of any dwelling, or vacant land where a dwelling is proposed (as described in Condition 6), located in areas that exceed noise and/or air quality criteria established in accordance with conditions 6.17, 6.18, and 6.50 of this consent, and at any time after the granting of development consent, may request the Applicant in writing to purchase the whole of that property.

11.6 In respect of a request to purchase land arising under condition 11.5, the Applicant shall pay the owner the acquisition price which shall take into account and provide payment for:

- a) a sum not less than the current market value of the owner's interest in the land at the date of this consent, as if the land was unaffected by the ACP the subject of this DA, having regard to:
 - (i) the existing use and permissible use of the land in accordance with the applicable planning instruments at the date of the written request; and
 - (ii) the presence of improvements on the land and/or any Council approved building or structure which although substantially commenced at the date of request is completed subsequent to that date.
- b) the owner's reasonable compensation for disturbance allowance and relocation costs within the Singleton or Muswellbrook Local Government Area, or within such other location as may be determined by the Director-General in exceptional circumstances; and
- c) the owner's reasonable costs for obtaining legal advice and expert witnesses for the purposes of determining the acquisition price of the land and the terms upon which it is to be acquired.

Notwithstanding any other condition of this consent, the Applicant may, upon request of the landowner, acquire any property affected by the project during the course of this consent on terms agreed to between the Applicant and the landowner.

11.7 In the event that the Applicant and any owner referred to in this condition cannot agree within the time limit upon the acquisition price of the land and/or the terms upon which it is to be acquired, then:

- a) either party may refer the matter to the Director-General, who shall request the President of the Australian Institute of Valuers and Land Economists to appoint a qualified independent valuer or Fellow of the Institute, who shall determine, after consideration of any submissions from the owners, a fair and reasonable acquisition price for the land as described in condition 11.6 and/or terms upon which it is to be acquired;
- b) in the event of a dispute regarding outstanding matters that cannot be resolved, the independent valuer shall refer the matter to the Director-General, recommending the appointment of a qualified panel. The Director-General, if satisfied that there is need for a qualified panel, shall arrange for the constitution of the panel. The panel shall consist of:
 - (i) the appointed independent valuer,
 - (ii) the Director-General or nominee, and
 - (iii) the President of the Law Society of NSW or nominee.

The qualified panel shall determine a fair and reasonable acquisition price as described in condition 11.6 above and/or the terms upon which the property is to be acquired.

11.8 The Applicant shall bear the costs of any valuation or survey assessment requested by the independent valuer, panel, or the Director-General and the costs of determination referred to in conditions 11.6 and 11.7.

11.9 Upon receipt of a determination pursuant to conditions 11.6 and 11.7, the Applicant shall, within 14 days, offer in writing to acquire the relevant land at a price not less than the determination. Should the Applicant's offer to acquire not be accepted by the owner within six (6) months of the date of such offer, the Applicant's obligations to purchase the property shall cease, unless otherwise agreed by the Director-General.

11.10 In the event that the Applicant and the land owner agree that only part of the land is to be transferred to the Applicant, the Applicant shall pay all reasonable costs associated with obtaining Council approval to any plan of subdivision and registration of the plan at the Office of the Registrar-General.

11.11 The provisions of conditions 11.5-11.10 do not apply to a land owner who is the holder of an authority under the Mining Act, 1992.

Joint Acquisition Management Plan

11.12 The Applicant shall, prior to commencement of mining operations of the ACP or as agreed in writing by the Director General, prepare a Joint Acquisition Management Plan as far as practical, with the agreement of surrounding existing and approved mines, to the satisfaction of the Director-General. The plan shall:

- a) provide details of a joint approach to be adopted by the Applicant, and surrounding existing and approved mines in regard to meeting the acquisition procedure requirements outlined in conditions 11.5-11.11 of this consent relating to the cumulative impacts of the ACP mine, and the surrounding existing and approved mines, should acquisition be required.

Contributions to Council

11.13 Prior to the commencement of construction, the Applicant shall enter into a legally binding agreement with SSC for financial and/or in kind contribution to SSC for the purpose of community enhancement to address the social, amenity and associated community infrastructure requirements arising from the operation of the development. The financial and/or in kind contribution shall be generally in accordance with the SSC Section 94 Contribution Plan No 1 (1993) and as agreed between the applicant and SSC. A copy of the agreement is to be forwarded to the Director-General.

Responsibility for the Costs of Remediation

11.14 The Applicant shall be responsible for the cost of all remedial works required including reasonable costs of Government agencies, arising from impacts of the mine not recoverable through the *Mine Subsidence Compensation Act 1961* including, but not limited to, remediation of natural features, rehabilitation of ecological systems, and the provision of supplementary water flows, as determined by the Director-General.

12. FURTHER APPROVALS AND AGREEMENTS

Statutory Requirements

12.1 The Applicant shall ensure that all statutory requirements including but not restricted to those set down by the Environmental Planning and Assessment Act 1979, Local Government Act 1993, Protection of the Environment Administration Act 1991, Protection of the Environment Operations Act 1997, Rivers and Foreshores Improvement Act 1948, Water Act 1912, National Parks and Wildlife Act 1974, and all other relevant legislation, Regulations, Australian Standards, Codes, Guidelines and Notices, Conditions, Directions, Notices and Requirements issued pursuant to statutory powers by the SSC, DEC, DPI - Minerals, DIPNR, RTA, DPI - Agriculture, DPI - Fisheries and other Government agencies, are fully met.

Structural Adequacy

12.2 Detailed plans and specifications relating to the design and construction of each structural element associated with the proposed development are to be submitted to the Principal Certifying Authority prior to the construction of each particular building or structure. Such plans and specifications must be accompanied by certification provided by a practicing professional structural engineer or an accredited certifier certifying the structural adequacy of the proposed building design and compliance with the Building Code of Australia.

Verification of Construction

12.3 All new buildings and structures, and alterations or additions to buildings and structures, shall be carried out in accordance with the relevant requirements of the BCA.

12.4 The Applicant shall provide to the Director-General and Council with copies of all Construction Certificates issued for buildings or structures and copies of all Occupation Certificates issued for the development.

Note: Part 4A of the *Environmental Planning and Assessment Act 1979* provides specific certification requirements.

12.5 The applicant shall ensure that arrangements are made for the Principal Certifying Authority to carry out INSPECTIONS of the building at the following stages of construction, as applicable:

- a) The PIER HOLES before they are filled with concrete.
- b) The FOOTING TRENCHES with reinforcing steel in position before concrete is placed.
- c) The REINFORCING STEEL when in position prior to placing concrete for slab/s, swimming pools or walls.
- d) The FRAMEWORK including roof members, wall ties, vermin wire, flashings and cavities where applicable, prior to fixing of any internal sheets. Note: All plumbing and electrical work shall be completed.
- e) The WET AREAS damp-proofing and flashing before lining or covering.
- f) The building or structure when COMPLETED, prior to occupation/use.

12.6 The applicant shall ensure that arrangements are made for Council to carry out INSPECTIONS at the following stages as applicable:

- a) INTERNAL DRAINAGE LINES before the floor is laid, or concrete placed.
- b) EXTERNAL DRAINAGE LINES before backfilling of the trenches.

Information on booking inspections with Council may be obtained either by telephone on (02) 65 787 290 or in person at the CUSTOMER SERVICE Counter. Inspection requests are subject to the following:-

- (i) Applicants are required to nominate the relevant development application number and location prior to the inspection request being granted.
- (ii) Clerical staff only will receive all requests for inspections.
- (iii) Where building work is not prepared, ready for inspection, applicants will be required to re-book inspections through the Customer Service Centre for the next available day and a re-inspection fee may be charged.
- (iv) Requests for inspections must be received prior to 9.30am on the working day the inspection is required.
- (v) Inspections within the township of Singleton will be conducted as AM inspections (10.00am to 1.00pm) and PM inspections (2.00pm to 4.00pm). Inspections for all other areas will be carried out at some stage during the day nominated.

12.7 All demolition work shall be carried out in accordance with *AS2601-1991 The Demolition of Structures*.

Approvals within a Mine Subsidence District

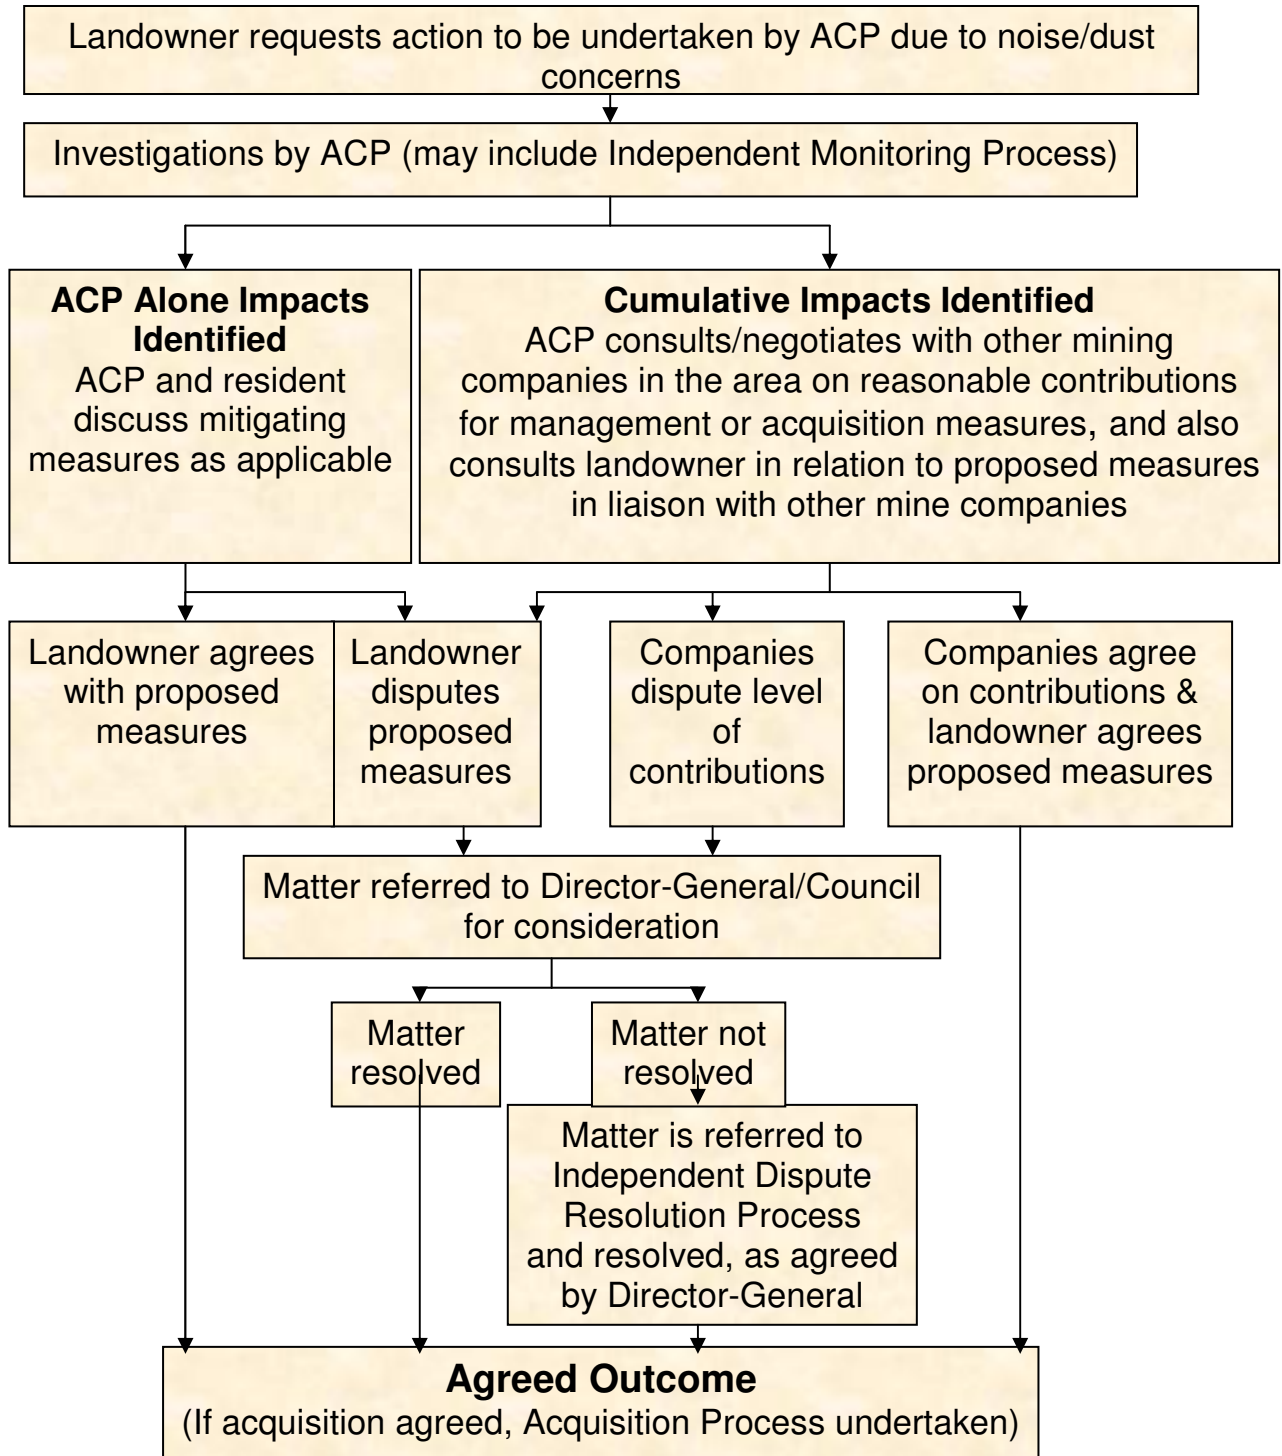

12.8 ⁶⁶The Applicant shall seek the approval of the Mine Subsidence Board for the construction of any improvements, including those related to the mine buildings and associated works, any relocation or diversion of infrastructure or existing improvements, prior to undertaking the works. The Applicant shall submit a copy of the final plans to MSB prior to commencement of construction.

⁶⁶ Incorporates MSB General Term of Approval

**SCHEDULE 3 – MAP OF AREA TO BE PLACED UNDER CONSERVATION
AGREEMENT**

**SCHEDULE A – EXPLANATORY FLOW CHARTS AND NOTES ON INDEPENDENT
DISPUTE RESOLUTION PROCESS**

Process for Management of Complaints for Noise/Dust Impacts

Independent Noise/Dust Monitoring Process

Resident considers noise/dust impacts from ACP alone or cumulatively with other mines are above stipulated criteria and makes written request to ACP for independent monitoring to be undertaken

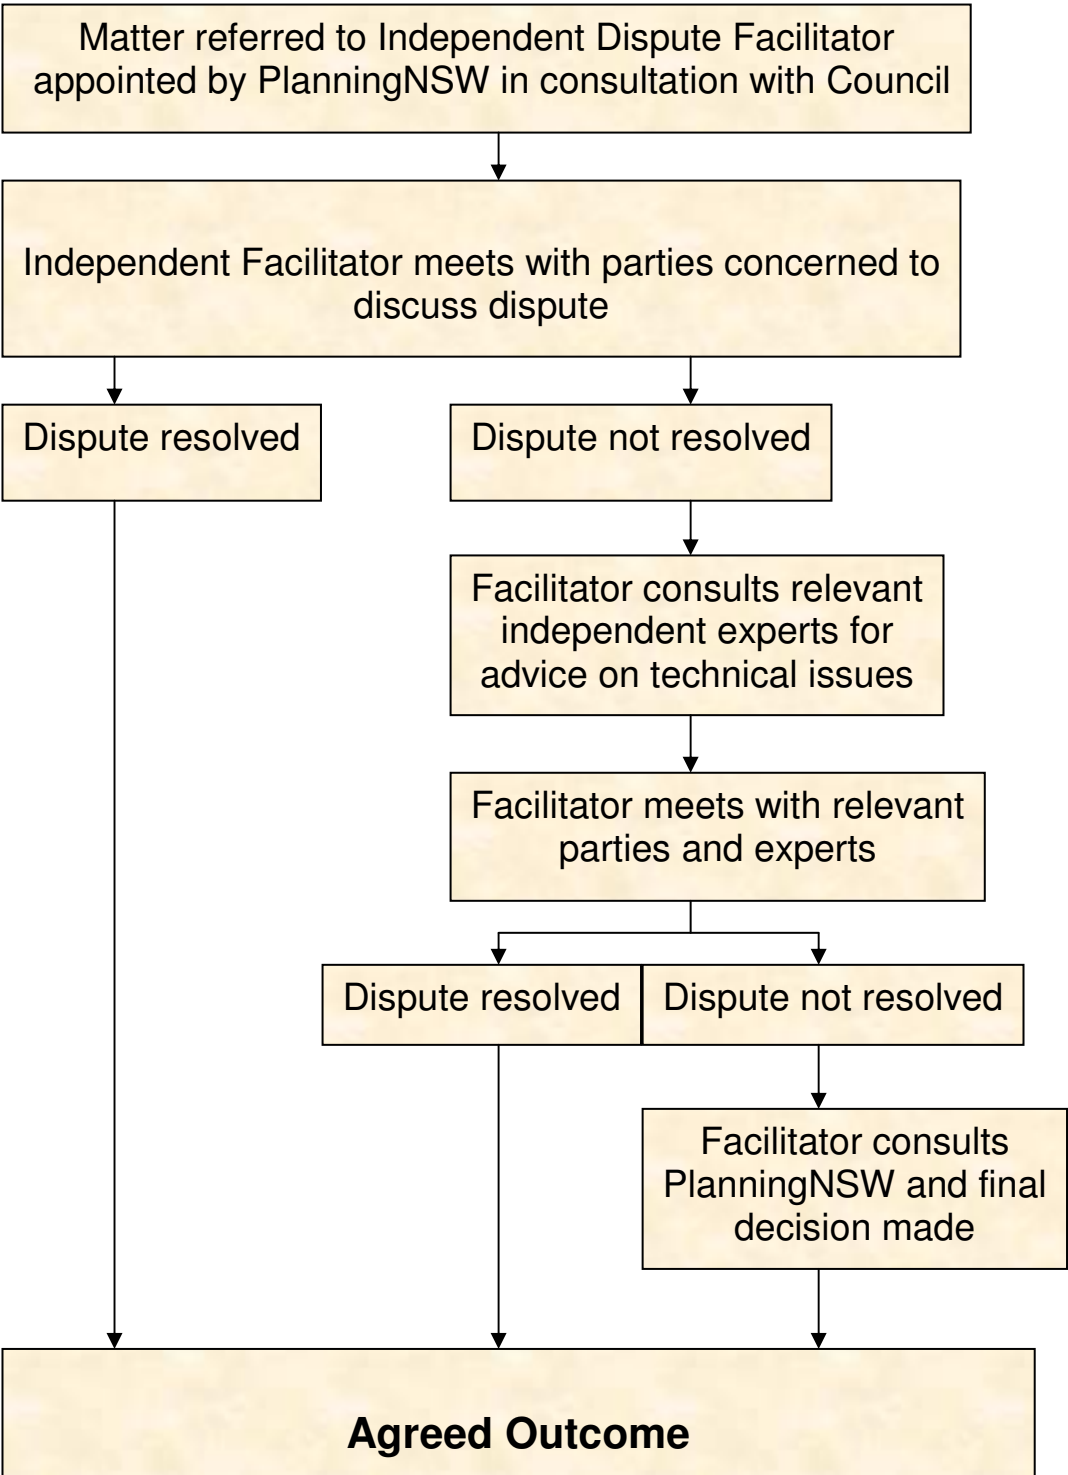

ACP approaches resident to discuss concerns and PlanningNSW for independent monitoring process to be triggered

PlanningNSW decides whether monitoring request is reasonable and if so appoints an independent noise/dust expert in consultation with resident and ACP (and other mines if cumulative impact is the nature of the complaint)

Monitoring undertaken in accordance with an agreed protocol in relation to impacts from the mine alone and/or cumulative impacts depending on the nature of complaint

Any impacts identified and relevant action undertaken in accordance with Process for Management of Complaints for Noise/Dust Impacts

Independent Dispute Resolution Process (Indicative only)

Acquisition Process

Landowner eligible for property acquisition and requests property be acquired

ACP is to pay the owner within 6 months of request:

- a sum not less than current market value at date of consent as if the land was unaffected by ACP
- reasonable compensation for disturbance allowance and relocation costs
- reasonable costs for obtaining legal advice and expert witnesses for determining acquisition price

Price and terms of acquisition agreed

Price and terms of acquisition not agreed

Matter referred to PlanningNSW and independent valuer appointed to determine a fair and reasonable acquisition price

Value/terms agreed

Value/terms not agreed

Matter referred to PlanningNSW & qualified acquisition panel appointed, if required

Value/terms determined

Offer to landowner
(owner has 6 months to accept offer)

Notes for Independent Dispute Resolution Process

1. The process will be subject to a procedural protocol to ensure that the process is transparent and consistent.
2. The process will be subject to terms of reference on both a qualitative and quantitative basis against which judgements will be made.
3. In relation to disputes regarding noise impacts, the process will only result in agreed outcomes regarding mitigation measures proposed by the Applicant in the noise management zone. Acquisition is not an option in the noise management zone, unless otherwise privately agreed between the Applicant and landowner, and therefore acquisition will not be an option for the dispute resolution process to consider in these cases.

SCHEDULE B – SUMMARY OF KEY DOCUMENTS REQUIRED UNDER THIS CONSENT

Note: The following table provides indicative information only and the conditions under Schedule 2 of this consent shall prevail in all circumstances.

ID	Document	Condition	Consultation	Approval authority	Timing	Comments
1	Conditions Compliance Report	1.10	N/A	Director General	Two weeks before construction

Environment Protection Licence

Licence - 11879

Information about this licence

Dictionary

A definition of terms used in the licence can be found in the dictionary at the end of this licence.

Responsibilities of licensee

Separate to the requirements of this licence, general obligations of licensees are set out in the Protection of the Environment Operations Act 1997 ("the Act") and the Regulations made under the Act. These include obligations to:

- ensure persons associated with you comply with this licence, as set out in section 64 of the Act;
- control the pollution of waters and the pollution of air (see for example sections 120 - 132 of the Act); and
- report incidents causing or threatening material environmental harm to the environment, as set out in Part 5.7 of the Act.

Variation of licence conditions

The licence holder can apply to vary the conditions of this licence. An application form for this purpose is available from the EPA.

The EPA may also vary the conditions of the licence at any time by written notice without an application being made.

Where a licence has been granted in relation to development which was assessed under the Environmental Planning and Assessment Act 1979 in accordance with the procedures applying to integrated development, the EPA may not impose conditions which are inconsistent with the development consent conditions until the licence is first reviewed under Part 3.6 of the Act.

Duration of licence

This licence will remain in force until the licence is surrendered by the licence holder or until it is suspended or revoked by the EPA or the Minister. A licence may only be surrendered with the written approval of the EPA.

Licence review

The Act requires that the EPA review your licence at least every 5 years after the issue of the licence, as set out in Part 3.6 and Schedule 5 of the Act. You will receive advance notice of the licence review.

Fees and annual return to be sent to the EPA

For each licence fee period you must pay:

- an administrative fee; and
- a load-based fee (if applicable).

The EPA publication "A Guide to Licensing" contains information about how to calculate your licence fees.

Environment Protection Licence

Licence - 11879

The licence requires that an Annual Return, comprising a Statement of Compliance and a summary of any monitoring required by the licence (including the recording of complaints), be submitted to the EPA. The Annual Return must be submitted within 60 days after the end of each reporting period. See condition R1 regarding the Annual Return reporting requirements.

Usually the licence fee period is the same as the reporting period.

Transfer of licence

The licence holder can apply to transfer the licence to another person. An application form for this purpose is available from the EPA.

Public register and access to monitoring data

Part 9.5 of the Act requires the EPA to keep a public register of details and decisions of the EPA in relation to, for example:

- licence applications;
- licence conditions and variations;
- statements of compliance;
- load based licensing information; and
- load reduction agreements.

Under s320 of the Act application can be made to the EPA for access to monitoring data which has been submitted to the EPA by licensees.

This licence is issued to:

ASHTON COAL OPERATIONS PTY LIMITED
PO BOX 699
SINGLETON NSW 2330

subject to the conditions which follow.

1 Administrative conditions

A1 What the licence authorises and regulates

A1.1 This licence authorises the carrying out of the scheduled development work listed below at the premises listed in A2.
Coal mine and coal washery

A1.2 This licence authorises the carrying out of the scheduled activities listed below at the premises specified in A2. The activities are listed according to their scheduled activity classification, fee-

Environment Protection Licence

Licence - 11879

based activity classification and the scale of the operation.

Unless otherwise further restricted by a condition of this licence, the scale at which the activity is carried out must not exceed the maximum scale specified in this condition.

Scheduled Activity
Mining for coal
Coal works

Fee Based Activity	Scale
Mining for coal	> 5000000 - T produced

- A1.3 The licensee must not carry on any scheduled activities until the scheduled development works are completed, except as elsewhere provided in this licence.

A2 Premises to which this licence applies

- A2.1 The licence applies to the following premises:

Premises Details
ASHTON COAL MINE
GLENNIES CREEK ROAD AND NEW ENGLAND HIGHWAY
CAMBERWELL
NSW
2330
ML 1533

A3 Other activities

Environment Protection Licence

Licence - 11879

A3.1 Not applicable.

A4 Information supplied to the EPA

A4.1 Works and activities must be carried out in accordance with the proposal contained in the licence application, except as expressly provided by a condition of this licence.

In this condition the reference to "the licence application" includes a reference to:

- (a) the applications for any licences (including former pollution control approvals) which this licence replaces under the Protection of the Environment Operations (Savings and Transitional) Regulation 1998; and
- (b) the licence information form provided by the licensee to the EPA to assist the EPA in connection with the issuing of this licence.

2 Discharges to air and water and applications to land

P1 Location of monitoring/discharge points and areas

P1.1 The following points referred to in the table below are identified in this licence for the purposes of monitoring and/or the setting of limits for the emission of pollutants to the air from the point.

Air

EPA Identification no.	Type of Monitoring Point	Type of Discharge Point	Description of Location
1	Dust monitoring		Locations shown on Figure 1 titled "Air Quality Monitoring Locations for EPL" dated 19/10/06.

P1.2 The following points referred to in the table are identified in this licence for the purposes of the monitoring and/or the setting of limits for discharges of pollutants to water from the point.

P1.3 The following utilisation areas referred to in the table below are identified in this licence for the purposes of the monitoring and/or the setting of limits for any application of solids or liquids to the utilisation area.

Environment Protection Licence

Licence - 11879

Water and land

EPA identification no.	Type of monitoring point	Type of discharge point	Description of location
2	Ambient surface water monitoring		In Bowmans Creek upstream of the mine shown as point SM3 in Figure 4 dated 8/8/03 titled "EPA Surface Water Monitoring Sites".
3	Ambient surface water monitoring		In Bowmans Creek near the New England Highway shown as point SM4 in Figure 4 dated 8/8/03 titled "EPA Surface Water Monitoring Sites"
4	Ambient surface water monitoring.		In Bowmans Creek near the proposed longwall panels shown as point SM5 in Figure 4 dated 8/8/03 titled "EPA Surface Water Monitoring Sites"
5	Ambient surface water monitoring		In Bowmans Creek at the Hunter River confluence shown as point SM6 in Figure 4 dated 8/8/03 titled "EPA Surface Water Monitoring Sites"
6	Ambient surface water monitoring.		In the Hunter River upstream of Bowmans Creek shown as point SM9 on Figure 4 dated 8/8/03 titled "EPA Surface Water Monitoring Sites".
7	Ambient surface water monitoring		In the Hunter River downstream of Bowmans Creek confluence shown as point SM10 on Figure 4 dated 8/8/03 titled "EPA Surface Water Monitoring Sites".
8	Groundwater monitoring		Locations shown on Figure 1A titled "Groundwater Monitoring Piezometer Locations for EPL" dated 26/10/06.

3 Limit conditions

L1 Pollution of waters

L1.1 Except as may be expressly provided in any other condition of this licence, the licensee must

Environment Protection Licence

Licence - 11879

comply with section 120 of the Protection of the Environment Operations Act 1997.

L2 Load limits

L2.1 Not applicable.

L2.2 Not applicable.

L3 Concentration limits

L3.1 Not applicable.

L3.2 Not applicable.

L3.3 Not applicable.

L4 Volume and mass limits

L4.1 Not applicable.

L5 Waste

L5.1 The licensee must not cause, permit or allow any waste generated outside the premises to be received at the premises for storage, treatment, processing, reprocessing or disposal or any waste generated at the premises to be disposed of at the premises, except as expressly permitted by the licence.

L5.2 This condition only applies to the storage, treatment, processing, reprocessing or disposal of waste at the premises if those activities require an environment protection licence.

L6 Noise Limits

L6.1 Noise from the premises must not exceed the limits specified in the table below:

Location	Day	Evening	Night	
	L _{Aeq} (15 minute)	L _{Aeq} (15 minute)	L _{Aeq} (15 minute)	L _{A1} (1 minute)
Any residence not owned by the licensee or not subject to an	38	38	36	46

Environment Protection Licence

Licence - 11879

subject to an agreement between the licensee and the residence owner as to an alternate noise limit.				
--	--	--	--	--

- L6.2 For the purpose of Condition 6.1:
- Day is defined as the period from 7am to 6pm Monday to Saturday and 8am to 6pm Sundays and Public Holidays,
 - Evening is defined as the period from 6pm to 10pm
 - Night is defined as the period from 10pm to 7am Monday to Saturday and 10pm to 8am Sundays and Public Holidays.
- L6.3 Noise from the premises is to be measured at the most affected point on or within the residential boundary or at the most affected point within 30m of the dwelling where the dwelling is more than 30m from boundary to determine compliance with the $L_{Aeq(15\text{ minute})}$ noise limits in condition L6.1. Where it can be demonstrated that direct measurement of noise from the premises is impractical, the EPA may accept alternative means of determining compliance. See Chapter 11 of the NSW Industrial Noise Policy. The modification factors presented in Section 4 of the NSW Industrial Noise Policy shall also be applied to the measured noise level where applicable.
- L6.4 Noise from the premises is to be measured or computed at 1m from the dwelling facade to determine compliance with condition 6.1 (LA1 (1 minute) noise limit).
- L6.5 The noise emission limits identified in condition L6.1 apply under the following meteorological conditions:
- (a) wind speeds up to 3m/s at 10m above ground level; and
 - (b) temperature inversion conditions up to 3°C/100m.
- L6.6 Open cut mining activities must only be carried out between the hours of 0700 and 2200 Monday to Saturday, and 0800 and 2200 on Sundays and Public Holidays.
- L7 Blasting limits**
- L7.1 Blasting in or on the premises must only be carried out between 0900 hours and 1700 hours, Monday to Saturday. Blasting in or on the premises must not take place on Sundays or Public Holidays without the prior approval of the EPA.
- L7.2 The overpressure level from blasting operations carried out in or on the premises must not:
- (a) exceed 115 dB(L) for more than 5% of the total number of blasts carried out on the premises within the 12 months annual reporting period; and
 - (b) exceed 120 dB(L) at any time

Environment Protection Licence

Licence - 11879

at any residence or noise sensitive location (such as a school or hospital) that is not owned by the licensee or subject of a private agreement between the owner of the residence or noise sensitive location and the licensee as to an alternative overpressure level.

- L7.3 The ground vibration peak particle velocity from blasting operations carried out in or on the premises must not:
- exceed 2mm/second for more than 5% of the total number of blasts carried out on the premises within the 12 months annual reporting period; and
 - exceed 10mm/second at any time
- at any residence or noise sensitive location (such as a school or hospital) that is not owned by the licensee or subject of a private agreement between the owner of the residence or noise sensitive location and the licensee as to an alternative ground vibration level.

4 Operating conditions

01 Activities must be carried out in a competent manner

- 01.1 Licensed activities must be carried out in a competent manner.

This includes:

- the processing, handling, movement and storage of materials and substances used to carry out the activity; and
- the treatment, storage, processing, reprocessing, transport and disposal of waste generated by the activity.

02 Maintenance of plant and equipment

- 02.1 All plant and equipment installed at the premises or used in connection with the licensed activity:
- must be maintained in a proper and efficient condition; and
 - must be operated in a proper and efficient manner.

03 Dust Control

- 03.1 All operations and activities occurring at the premises must be carried out in a manner that will minimise the emission of dust from the premises.
- 03.2 All trafficable areas, coal storage areas and vehicle manoeuvring areas in or on the premises must be maintained, at all times, in a condition that will minimise the generation, or emission from the premises, of wind-blown or traffic generated dust.

04 Stormwater Management

- 04.1 A Stormwater Management Scheme must be prepared for the development and must be implemented. Implementation of the Scheme must mitigate the impacts of stormwater runoff from and within the premises following the completion of construction activities. The Scheme should be

Environment Protection Licence

Licence - 11879

consistent with the Stormwater Management Plan for the catchment. If a Stormwater Management Plan has not yet been prepared the Scheme should be consistent with the guidance contained in *Managing Urban Stormwater: Council Handbook* (available from the EPA).

- O4.2 Banks, channels and similar works must be constructed to divert stormwater away from disturbed or contaminated land surfaces such as mine workings, haul roads, overburden disposal areas, coal handling areas and wastewater treatment facilities. All diversion banks, channels and points of discharge must be constructed or stabilised so as to minimise erosion and scouring.

O5 Wastewater management

- O5.1 A water management system must be constructed and utilised to manage the collection, storage, treatment, use and disposal of minewater, sewage effluent and other wastewater.
- O5.2 Bund(s) must be installed around areas in which fuels, oils and chemicals are stored. Bunds must:
- have walls and floors constructed of impervious materials;
 - be of sufficient capacity to contain 110% of the volume of the tank (or 110% volume of the largest tank where a group of tanks are installed);
 - have walls not be less than 250 millimetres high;
 - have floors graded to a collection sump; and
 - not have a drain valve incorporated in the bund structure.
- O5.3 A wastewater treatment facility with oil separator and sediment trap must be installed to treat drainage from the hardstand, vehicle servicing and general workshop areas.
- O5.4 An area must be provided for the use of effluent from the sewage treatment plant. The design of the system must be in accordance with the EPA's draft guideline "Utilisation of Treated Effluent by Irrigation".
- O5.5 Wastewater utilisation areas must effectively utilise the wastewater applied to those areas. This includes the use for pasture or crop production, as well as ensuring the soil is able to absorb the nutrients, salts, hydraulic load and organic materials in the solids or liquids. Monitoring of land and receiving waters to determine the impact of wastewater application may be required by the EPA.

O6 Incineration or open burning

- O6.1 There must be no incineration or open burning of any material(s) on the premises, except as specifically authorised by the EPA.

5 Monitoring and recording conditions

Environment Protection Licence

Licence - 11879

M1 Monitoring records

- M1.1 The results of any monitoring required to be conducted by this licence or a load calculation protocol must be recorded and retained as set out in this condition.
- M1.2 All records required to be kept by this licence must be:
- in a legible form, or in a form that can readily be reduced to a legible form;
 - kept for at least 4 years after the monitoring or event to which they relate took place; and
 - produced in a legible form to any authorised officer of the EPA who asks to see them.
- M1.3 The following records must be kept in respect of any samples required to be collected for the purposes of this licence:
- the date(s) on which the sample was taken;
 - the time(s) at which the sample was collected;
 - the point at which the sample was taken; and
 - the name of the person who collected the sample.

M2 Requirement to monitor concentration of pollutants discharged

- M2.1 For each monitoring/discharge point or utilisation area specified below (by a point number), the licensee must monitor (by sampling and obtaining results by analysis) the concentration of each pollutant specified in Column 1. The licensee must use the sampling method, units of measure, and sample at the frequency, specified opposite in the other columns:

POINT 1

Pollutant	Units of measure	Frequency	Sampling Method
PM10	micrograms per cubic metre	Daily	Australian Standard 3580.9.8 - 2001
Particulates - Deposited Matter	grams per square metre per month	Monthly	AM-19
Total suspended particles	micrograms per cubic metre	Every 6 days	24 hour composite sample

POINTS 2,3,4,5,6,7

Pollutant	Units of measure	Frequency	Sampling Method
Conductivity	microsiemens per centimetre	Monthly	A probe designed to measure the range 0 to 10,000 uS/cm

POINT 8

Pollutant	Units of measure	Frequency	Sampling Method
Conductivity	microsiemens per centimetre	Every 6 months	Grab sample
Standing Water Level	metres	Every 6 months	In line instrumentation

M3 Testing methods - concentration limits

Environment Protection Licence

Licence - 11879

- M3.1 Monitoring for the concentration of a pollutant emitted to the air required to be conducted by this licence must be done in accordance with:
- (a) any methodology which is required by or under the Act to be used for the testing of the concentration of the pollutant; or
 - (b) if no such requirement is imposed by or under the Act, any methodology which a condition of this licence requires to be used for that testing; or
 - (c) if no such requirement is imposed by or under the Act or by a condition of this licence, any methodology approved in writing by the EPA for the purposes of that testing prior to the testing taking place.

Note: The Protection of the Environment Operations (Clean Air) Regulation 2002 requires testing for certain purposes to be conducted in accordance with test methods contained in the publication "Approved Methods for the Sampling and Analysis of Air Pollutants in NSW".

- M3.2 Subject to any express provision to the contrary in this licence, monitoring for the concentration of a pollutant discharged to waters or applied to a utilisation area must be done in accordance with the Approved Methods Publication unless another method has been approved by the EPA in writing before any tests are conducted.

M4 Recording of pollution complaints

- M4.1 The licensee must keep a legible record of all complaints made to the licensee or any employee or agent of the licensee in relation to pollution arising from any activity to which this licence applies.
- M4.2 The record must include details of the following:
- (a) the date and time of the complaint;
 - (b) the method by which the complaint was made;
 - (c) any personal details of the complainant which were provided by the complainant or, if no such details were provided, a note to that effect;
 - (d) the nature of the complaint;
 - (e) the action taken by the licensee in relation to the complaint, including any follow-up contact with the complainant; and
 - (f) if no action was taken by the licensee, the reasons why no action was taken.
- M4.3 The record of a complaint must be kept for at least 4 years after the complaint was made.
- M4.4 The record must be produced to any authorised officer of the EPA who asks to see them.

M5 Telephone complaints line

- M5.1 The licensee must operate during its operating hours a telephone complaints line for the purpose of receiving any complaints from members of the public in relation to activities conducted at the premises or by the vehicle or mobile plant, unless otherwise specified in the licence.

Environment Protection Licence

Licence - 11879

M5.2 The licensee must notify the public of the complaints line telephone number and the fact that it is a complaints line so that the impacted community knows how to make a complaint.

M5.3 Conditions M5.1 and M5.2 do not apply until 3 months after:

- the date of the issue of this licence or
- if this licence is a replacement licence within the meaning of the Protection of the Environment Operations (Savings and Transitional) Regulation 1998, the date on which a copy of the licence was served on the licensee under clause 10 of that regulation.

M6 Requirement to monitor volume or mass

M6.1 Not applicable.

M7 Requirement to monitor weather

M7.1 The licensee must collect and analyse meteorological data at an on-site monitoring station for the parameters, at a frequency, averaging period and using a method as specified in the table below.

Meteorological Monitoring

Parameter	Units of measure	Frequency	Averaging Period	Sampling Method
Atmospheric inversion	0C/100m	Continuous		instrumental
Temperature @ 1.2m	C	Continuous	1 hour	AM-4
Rainfall	Mm		24 hours	Standard rain gauge
Wind direction @ 10m		Continuous	10 minutes	AM2 & AM-4
Wind speed @ 10m	m/sec	Continuous	10 minutes	AM2 & AM-4

Note: All methods are specified in the *Approved Methods for the Sampling and Analysis of Air Pollutants in New South Wales* and all monitoring must be conducted strictly in accordance with the requirements outlined in this document.

M8 Requirement to monitor blasts

M8.1 In order to determine compliance with condition L7:

- Airblast overpressure and ground vibration levels must be measured at, or near, the nearest residence, or noise sensitive location, that is likely to be most affected by the blast and that is not owned by the licensee, or is the subject of a private agreement between the owner of the residence, or noise sensitive location, and the licensee, as to an alternative overpressure or ground vibration level for all blasts carried out in, or on, the premises; and
- Instrumentation used to measure the airblast overpressure and ground vibration levels meet the requirements of Australian Standard 2187.2 of 1993.

Environment Protection Licence

Licence - 11879

M9 Requirement to monitor noise

M9.1 A noise compliance assessment report must be submitted to EPA on an annual basis with the Annual Return as set out in Condition R1. The report must be prepared by an accredited acoustical consultant and determine compliance with the noise limits in Condition L6.1.

6 Reporting conditions

R1 Annual return documents

What documents must an Annual Return contain?

R1.1 The licensee must complete and supply to the EPA an Annual Return in the approved form comprising:

- (a) a Statement of Compliance; and
- (b) a Monitoring and Complaints Summary.

A copy of the form in which the Annual Return must be supplied to the EPA accompanies this licence. Before the end of each reporting period, the EPA will provide to the licensee a copy of the form that must be completed and returned to the EPA.

Period covered by Annual Return

R1.2 An Annual Return must be prepared in respect of each reporting period, except as provided below.

Note: The term "reporting period" is defined in the dictionary at the end of this licence. Do not complete the Annual Return until after the end of the reporting period.

R1.3 Where this licence is transferred from the licensee to a new licensee:

- (a) the transferring licensee must prepare an Annual Return for the period commencing on the first day of the reporting period and ending on the date the application for the transfer of the licence to the new licensee is granted; and
- (b) the new licensee must prepare an Annual Return for the period commencing on the date the application for the transfer of the licence is granted and ending on the last day of the reporting period.

Note: An application to transfer a licence must be made in the approved form for this purpose.

R1.4 Where this licence is surrendered by the licensee or revoked by the EPA or Minister, the licensee must prepare an Annual Return in respect of the period commencing on the first day of the reporting period and ending on:

- (a) in relation to the surrender of a licence - the date when notice in writing of approval of the surrender is given; or
- (b) in relation to the revocation of the licence - the date from which notice revoking the licence operates.

Deadline for Annual Return

Environment Protection Licence

Licence - 11879

- R1.5 The Annual Return for the reporting period must be supplied to the EPA by registered post not later than 60 days after the end of each reporting period or in the case of a transferring licence not later than 60 days after the date the transfer was granted (the 'due date').

Notification where actual load can not be calculated

- R1.6 Not applicable.

Licensee must retain copy of Annual Return

- R1.7 The licensee must retain a copy of the Annual Return supplied to the EPA for a period of at least 4 years after the Annual Return was due to be supplied to the EPA.

Certifying of Statement of Compliance and signing of Monitoring and Complaints Summary

- R1.8 Within the Annual Return, the Statement of Compliance must be certified and the Monitoring and Complaints Summary must be signed by:

- (a) the licence holder; or
- (b) by a person approved in writing by the EPA to sign on behalf of the licence holder.

- R1.9 A person who has been given written approval to certify a certificate of compliance under a licence issued under the Pollution Control Act 1970 is taken to be approved for the purpose of this condition until the date of first review of this licence.

R2 Notification of environmental harm

Note: The licensee or its employees must notify the EPA of incidents causing or threatening material harm to the environment as soon as practicable after the person becomes aware of the incident in accordance with the requirements of Part 5.7 of the Act.

- R2.1 Notifications must be made by telephoning the EPA's Pollution Line service on 131 555.

- R2.2 The licensee must provide written details of the notification to the EPA within 7 days of the date on which the incident occurred.

R3 Written report

- R3.1 Where an authorised officer of the EPA suspects on reasonable grounds that:
- (a) where this licence applies to premises, an event has occurred at the premises; or
 - (b) where this licence applies to vehicles or mobile plant, an event has occurred in connection with the carrying out of the activities authorised by this licence,
- and the event has caused, is causing or is likely to cause material harm to the environment (whether the harm occurs on or off premises to which the licence applies), the authorised officer may request a written report of the event.

- R3.2 The licensee must make all reasonable inquiries in relation to the event and supply the report to

Environment Protection Licence

Licence - 11879

the EPA within such time as may be specified in the request.

- R3.3 The request may require a report which includes any or all of the following information:
- (a) the cause, time and duration of the event;
 - (b) the type, volume and concentration of every pollutant discharged as a result of the event;
 - (c) the name, address and business hours telephone number of employees or agents of the licensee, or a specified class of them, who witnessed the event;
 - (d) the name, address and business hours telephone number of every other person (of whom the licensee is aware) who witnessed the event, unless the licensee has been unable to obtain that information after making reasonable effort;
 - (e) action taken by the licensee in relation to the event, including any follow-up contact with any complainants;
 - (f) details of any measure taken or proposed to be taken to prevent or mitigate against a recurrence of such an event; and
 - (g) any other relevant matters.
- R3.4 The EPA may make a written request for further details in relation to any of the above matters if it is not satisfied with the report provided by the licensee. The licensee must provide such further details to the EPA within the time specified in the request.

R4 Reporting of exceedance of blasting limits

- R4.1 The licensee must report any exceedance of the licence blasting limits to the regional office of the EPA as soon as practicable after the exceedance becomes known to the licensee or to one of the licensee's employees or agents.

R5 Blast monitoring reporting

- R5.1 The licensee must supply annually a Blast Monitoring Report with the Annual Return, which must include the following information relating to each blast carried out within the premises during the respective reporting period:
- (a) the date and time of the blast;
 - (b) the location of the blast;
 - (c) the blast monitoring results at each blast monitoring station; and
 - (d) an explanation for any missing blast monitoring readings.

General conditions

G1 Copy of licence kept at the premises

- G1.1 A copy of this licence must be kept at the premises to which the licence applies.
- G1.2 The licence must be produced to any authorised officer of the EPA who asks to see it.

Environment Protection Licence

Licence - 11879

G1.3 The licence must be available for inspection by any employee or agent of the licensee working at the premises.

G2 Contact number for incidents and responsible employees

G2.1 The licensee must operate one 24-hour telephone contact line for the purpose of enabling the EPA:

- (a) to contact the licensee or a representative of the licensee who can respond at all times to incidents relating to individual premises, and
- (b) to contact the licensee's senior employees or agents authorised at all times to:
 - (i) speak on behalf of the licensee, and
 - (ii) provide any information or document required under licence.

Pollution studies and reduction programs

U1 The Licensee must provide a report which includes but need not be limited to:

- A comparison of actual measured noise levels generated by the Licensee with those predicted in the EIS under all conditions including inversions and noise enhancing winds; and
- A list of measures to be taken by the Licensee to ensure that noise generated by the mine is not in excess of the predicted levels or limits.

The report must be submitted to the DECC's Regional, Manager Hunter (Environment Protection and Regulation Division) by 10 July 2009.

Special conditions

E1 Not applicable.

Dictionary

General Dictionary

In this licence, unless the contrary is indicated, the terms below have the following meanings:

3DGM [in relation to a concentration limit]

Means the three day geometric mean, which is calculated by multiplying the results of the analysis of three samples collected on consecutive days and then taking the cubed root of that amount. Where one or more of the samples is zero or below the detection limit for the analysis, then 1 or the detection limit respectively should be used in place of those samples

Environment Protection Licence

Licence - 11879

Act	Means the Protection of the Environment Operations Act 1997
activity	Means a scheduled or non-scheduled activity within the meaning of the Protection of the Environment Operations Act 1997
actual load	Has the same meaning as in the Protection of the Environment Operations (General) Regulation 1998
AM	Together with a number, means an ambient air monitoring method of that number prescribed by the <i>Approved Methods for the Sampling and Analysis of Air Pollutants in New South Wales</i> .
AMG	Australian Map Grid
anniversary date	The anniversary date is the anniversary each year of the date of issue of the licence. In the case of a licence continued in force by the Protection of the Environment Operations Act 1997, the date of issue of the licence is the first anniversary of the date of issue or last renewal of the licence following the commencement of the Act.
annual return	Is defined in R1.1
Approved Methods Publication	Has the same meaning as in the Protection of the Environment Operations (General) Regulation 1998
assessable pollutants	Has the same meaning as in the Protection of the Environment Operations (General) Regulation 1998
BOD	Means biochemical oxygen demand
CEM	Together with a number, means a continuous emission monitoring method of that number prescribed by the <i>Approved Methods for the Sampling and Analysis of Air Pollutants in New South Wales</i> .
COD	Means chemical oxygen demand
composite sample	Unless otherwise specifically approved in writing by the EPA, a sample consisting of 24 individual samples collected at hourly intervals and each having an equivalent volume.
cond.	Means conductivity
environment	Has the same meaning as in the Protection of the Environment Operations Act 1997
environment protection legislation	Has the same meaning as in the Protection of the Environment Administration Act 1991
EPA	Means Environment Protection Authority of New South Wales.
fee-based activity classification	Means the numbered short descriptions in Schedule 1 of the Protection of the Environment Operations (General) Regulation 1998.
flow weighted composite sample	Means a sample whose composites are sized in proportion to the flow at each composites time of collection.
general solid waste (non-putrescible)	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
general solid waste (putrescible)	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
grab sample	Means a single sample taken at a point at a single time
hazardous waste	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
licensee	Means the licence holder described at the front of this licence

Environment Protection Licence

Licence - 11879

load calculation protocol	Has the same meaning as in the Protection of the Environment Operations (General) Regulation 1998
local authority	Has the same meaning as in the Protection of the Environment Operations Act 1997
material harm	Has the same meaning as in section 147 Protection of the Environment Operations Act 1997
MBAS	Means methylene blue active substances
Minister	Means the Minister administering the Protection of the Environment Operations Act 1997
mobile plant	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
motor vehicle	Has the same meaning as in the Protection of the Environment Operations Act 1997
O&G	Means oil and grease
percentile [in relation to a concentration limit of a sample]	Means that percentage [eg.50%] of the number of samples taken that must meet the concentration limit specified in the licence for that pollutant over a specified period of time. In this licence, the specified period of time is the Reporting Period unless otherwise stated in this licence.
plant	Includes all plant within the meaning of the Protection of the Environment Operations Act 1997 as well as motor vehicles.
pollution of waters [or water pollution]	Has the same meaning as in the Protection of the Environment Operations Act 1997
premises	Means the premises described in condition A2.1
public authority	Has the same meaning as in the Protection of the Environment Operations Act 1997
regional office	Means the relevant EPA office referred to in the Contacting the EPA document accompanying this licence
reporting period	For the purposes of this licence, the reporting period means the period of 12 months after the issue of the licence, and each subsequent period of 12 months. In the case of a licence continued in force by the Protection of the Environment Operations Act 1997, the date of issue of the licence is the first anniversary of the date of issue or last renewal of the licence following the commencement of the Act.
restricted solid waste	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
scheduled activity	Means an activity listed in Schedule 1 of the Protection of the Environment Operations Act 1997
special waste	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
TM	Together with a number, means a test method of that number prescribed by the <i>Approved Methods for the Sampling and Analysis of Air Pollutants in New South Wales</i> .
TSP	Means total suspended particles
TSS	Means total suspended solids
Type 1 substance	Means the elements antimony, arsenic, cadmium, lead or mercury or any compound containing one or more of those elements
Type 2 substance	Means the elements beryllium, chromium, cobalt, manganese, nickel, selenium, tin or vanadium or any compound containing one or more of those elements
utilisation area	Means any area shown as a utilisation area on a map submitted with the application for this licence
waste	Has the same meaning as in the Protection of the Environment Operations Act 1997

Environment Protection Licence

Licence - 11879

waste type

Means liquid, restricted solid waste, general solid waste (putrescible), general solid waste (non-putrescible), special waste or hazardous waste

Mr Mitchell Bennett

Environment Protection Authority

(By Delegation)

Date of this edition - 28-Apr-2009

End Notes

- 1 Licence varied by notice 1032190, issued on 10-Nov-2003, which came into effect on 05-Dec-2003.
- 2 Licence varied by notice 1043742, issued on 28-Feb-2005, which came into effect on 25-Mar-2005.
- 3 Licence varied by notice 1051915, issued on 17-Nov-2005, which came into effect on 12-Dec-2005.
- 4 Licence varied by notice 1066832, issued on 20-Nov-2006, which came into effect on 20-Nov-2006.
- 5 Licence varied by notice 1078274, issued on 27-Dec-2007, which came into effect on 27-Dec-2007.
- 6 Licence varied by notice 1093983, issued on 28-Apr-2009, which came into effect on 28-Apr-2009.
