Dubbo	metric	250K	7634211	NWPS Site No.: 36-3-134
Gulgong	1st	1:50000	6/30E 2117N	Site types: SHELTER & ART Date: 28-1-88 Filed by: SW

Site name: Murrumbidgee No 1 Locality/Property Name: _____
 Owner/Manager: Mr M.J. Carlisle Address: Ulan (phone 063-734693)
 Local Post Office: Ulan NPWS District: Muswellbrook Region: Central

Reason for Investigation (Give R.O. Instruction No. where applicable):
private

36-3-0134

Portion No.: 97 Other Land Category: _____ Plan/Sketch/Section of Site attached? YES/NO
 Parish: Wilpinjong County: Phillip How many? 2

Air Photo Refs. (For stereo pair) _____ Photos Taken? YES/NO
 How many attached? 21

How to get to the site.
 (Refer to permanent features, give best approach to site eg. from above, below, along cliff. Draw diagram on separate sheet.)

Must have permission to enter
See Mr Carlisle for directions
to site
phone number Mr Kevin Carlisle
brother to Max.

Site Recorded by: W. T. Bluff Date: 7/87
 Address/Institution: Mortdale

SITE PLAN — SHOW SCALE + LOCATION OF ART

x Rubbed
Rock.

DIMENSIONS:

23.0m

ASPECT:

43°

SITE CROSS SECTION — DO NOT DIG

CONDITION OF SITE:

Causes of Art Damage:

- Vandalism
- Graffiti
- Foot Traffic
- Camping
- Pastoral
- Urban
- Mining
- Plant/Moss/Lichen
- Smoke
- None
- Other (Specify):

Erosion Damage:

- Exfoliation
- Water
- Fracturing
- Wind
- Rock Fall
- Salt
- None
- Other

Animal Damage:

- Dust
- Rubbed Surfaces
- Disturbed Deposit
- Bird/Insect Nest
- None
- Other

Description of Site Condition:

large shelter with pencil charcoal & paint over but names also scratched in rock lying on floor.

Moolarben Coal

**Re: Management Recommendations for Section 75W Report Moolarben
Proposed Pipeline and ROM Hopper Site.**

Murong Gialinga ATSIC agrees with -

- Surface collection at sites S1 310.312
- Restrictions on the pipeline route to avoid disturbance to existing Aboriginal Sites and Artifacts.
- Monitoring prior to the construction of the ROM Hopper and also Monitoring during the construction.

Collection of Artifacts -

Murong Gialinga ATSIC would like to participate in the collection and relocation or safe keeping of the Artifacts

Also Murong Gialinga ATSIC would like a full environmental and Aboriginal Assessment of all sites located on the Moolarben Mine lease to see how each site relates to each other.

Murong Gialinga ATSIC is looking forward to future survey and monitoring work at Moolarben

Thank You

*On Behalf of Murong Gialinga ATSIC

Giles Hamm

PO Box 67

Katoomba NSW 2780

14th July 2009

Dear Giles,

On behalf of the Mudgee LALC I am writing to inform you that the members of the Mudgee LALC have considered the proposed management recommendations for the recent Section 75W review for the proposed MCP pipe-line and ROM Hopper site and have agreed with all of the recommendations.

Members also would like to request the inclusion of monitoring during the removal of the top soils for any areas of the development which will be impacted.

Please do not hesitate to contact me if you have any queries.

Yours Sincerely

Tony Lonsdale

A/G CEO

Appendix 5

GENERAL GLOSSARY OF TERMS

Analytical Recording	A process of site recording which obtains detailed archaeological data useful in archaeological analysis.
Analysis	Evaluation of archaeological data to determine the archaeological significance of sites recorded within an impact area.
Archaeological Deposit	A layer of soil material containing archaeological remains.
Archaeological Investigation	The process of assessing the archaeological potential of an impact area by a qualified archaeologist.
Archaeological Comparability	The evaluation of whether archaeological sites are uniformly different or similar across an impact area.
Archaeological Data	Archaeological information that is recorded as a result of an archaeological investigation.
Artefact	Any object made by human agency (e.g. stone artefacts).
Artefact Scatter	A collection of artefacts usually lying as a lag deposit on an eroding surface.
Assemblage	<ol style="list-style-type: none">1. A group of stone artefacts found in close association with one another.2. Any group of items designated for analysis-without any assumptions of chronological or spatial relatedness (Witter 1995)
Avoidance	A management strategy which protects Aboriginal Sites within an impact area by avoiding them totally in development.
Broken Flake	A flake which is either a distal fragment or proximal fragment.

Campsite	A site which contains a variety of artefactual data not specific to one type of stone tool reduction sequence.
Complete Flake	A flake which is whole and not broken.
Core	A lump or nodule of stone from which flakes have been removed.
Debitage	Unmodified flakes or fragments of stone material removed as a result of stone tool manufacture or modification.
Flake	A piece of stone detached from a core, displaying a bulb of percussion and striking platform
Flaked Piece	A fragment of stone where negative flake scarring is visible but no obvious striking platforms are present.
Hearth	The site of a campfire represented by charcoal, burnt earth, ash and sometimes stones used as heat retainers.
Isolated Find	A single artefact found in an isolated context.
Impact Area	An area that requires archaeological investigation and management assessment
In situ	Latin words meaning 'on the spot, undisturbed'.
Knapping Floor	A location on a site which normally represents a stone artefact reduction episode.
Landform	Any one of the various features that make up the surface of the earth.
Landscape	That part of the land's surface, more or less extensive being viewed or under study, that relates to all aspects of its physical appearance, including various vegetation associations and landforms.
Land System	An area, or group of areas, commonly delineated on a map, throughout which there is a recurring pattern of topography, soils, and vegetation.

Land Unit	An area of common landform, and frequently with common geology, soils, and vegetation types, occurring repeatedly at similar points in the landscape over a defined region. It is a constituent part of a land system.
Management Plans	Conservation plans which identify short and long term management strategies for all known sites recorded within an impact area.
Methodology	The procedures used to undertake an archaeological investigation.
Minimum Requirements	The minimum standard for which NPWS will accept the reporting of an archaeological investigation.
Mitigation	To address the problem of conflict between land use and site conservation.
Open Site	An archaeological site situated within an open space (e.g. archaeological material located on a creek bank, in a forest, on a hill etc).
Open Area Excavation	A method of excavation where large areas of an archaeological site are open at any one time. A horizontal representation of Aboriginal occupation of different archaeological features is considered to be more important than vertical stratigraphic relationships.
Research Design	A research strategy for carrying out an intensive archaeological investigation and analysis.
Sampling	The process of selecting part of an area under archaeological investigation as a basis for generalising about the whole.
Sample Unit	An area of investigation which is uniform size or density and which can be quantified for analytical reasons.

Salvage	A method by which an archaeological site or group of sites may be fully investigated before they are totally destroyed by a development.
Site	A place where past human activity is identifiable.
Site Recording	The systematic process of collecting archaeological data for an archaeological investigation
Spatial Significance	A site which may contain potential sub-surface deposits or in situ material useful in the analysis of human use of land and site formation process.
Summary Recording	A process of site recording where archaeological data is collected on a summary level only.
Survey Coverage	A graphic and statistical representation of how much of an impact area was actually surveyed and therefore assessed.
Technological Significance	Artefactual material which may contain types or items, although not unique, may be included in a sample to demonstrate an aspect of stone artefact variability.
Test excavation	A process of exploratory excavation carried out on a small scale and used to determine site extent, site condition and excavation potential.
